Bureau of Economic Analysis

Survey of Current Business

Table of Contents
May 2004

1. Business Situation: Advance Estimates for the First Quarter of 2004

Real GDP increased 4.2 percent in the first quarter of 2004 after increasing 4.1 percent in the fourth quarter of 2003. The price index for gross domestic purchases increased 3.2 percent after increasing 1.3 percent; the acceleration was partly accounted for by energy prices. Real disposable personal income increased 4.3 percent after increasing 0.5 percent.

7. Fixed Assets and Consumer Durable Goods: Preliminary Estimates for 2002 and Revised Estimates for 1925-2001

As part of the comprehensive NIPA revision, the Bureau of Economic Analysis (BEA) has released updated estimates of fixed assets and consumer durable goods. These estimates incorporate several key statistical improvements, including longer service lives for aircraft, estimates of depreciation for light trucks, and an updated depreciation schedule for autos. They also incorporate changes in classification, including government structures by function and four new components of the types of nonresidential structures.

For 1925-2002, the net stock at current cost grew at an average annual rate of 6.3 percent, and the net stock at real cost grew 2.9 percent.

23. Comprehensive NIPA Revision: Newly Available Tables

27. Comprehensive Revision of State Personal Income: Preliminary Estimates for 2003 and Revised Estimates for 1969-2002

On April 27, 2004, BEA released the results of the latest comprehensive revision of quarterly and annual estimates of state personal income that incorporates the results of the recent comprehensive NIPA revision, new data and newly available data, and improved methods for preparing the state estimates. The timing of this release represents an acceleration in the availability of state estimates that are consistent with the comprehensive NIPA revision. The revisions to state personal income are generally small and mixed in direction.

D-1. BEA Current and Historical Data

Looking Ahead

Comprehensive Revision of the Annual Industry Accounts. An article in the June Survey will present the results of integrating BEA's annual input-output accounts with the GDP-by-industry accounts.

Comprehensive Revision of Local Area Personal Income. The results of the comprehensive revision of personal income for counties and metropolitan areas will be presented in the June Survey. The revised estimates will incorporate the results of the recent comprehensive NIPA and state revisions, improvements in the source data and in the methods that are used to prepare the estimates, and newly available data.

Business Situation

Advance Estimates for the First Quarter of 2004

THE U.S. economy grew at about the same rate at the beginning of 2004 as at the end of 2003, according to the "advance" estimates of the national income and product accounts (NIPAs) (chart 1). Prices, in contrast, increased more than at the end of 2003.

The advance estimates for the first quarter of 2004 show the following:

- Real GDP increased 4.2 percent after increasing 4.1 percent in the fourth quarter of 2003 (table 1).[1]
- Prices of goods and services purchased by U.S. residents increased 3.2 percent after increasing 1.3 percent. Excluding the relatively volatile prices of food and energy, the price index increased 2.3 percent after increasing 1.5 percent.

Consumer spending, government spending, and international trade contributed to the slight step-up in GDP growth.[2]

Consumer spending increased 3.8 percent, and it contributed 2.65 percentage points to GDP growth after contributing 2.29 percentage points in the fourth quarter. Purchases of nondurable goods and of services increased more than in the fourth quarter, but purchases of durable goods turned down. The step-up in nondurable goods was accounted for by food and clothing; in contrast, purchases of energy goods decreased after increasing. The step-up in services was largely accounted for by net foreign travel and by brokerage charges and investment counseling.[3] The slowdown in durable goods was mainly accounted for by motor vehicles.

1. "Real" estimates are in chained (2000) dollars, and price indexes are chain-type measures.

Quarterly estimates in the NIPAs are expressed at seasonally adjusted annual rates, unless otherwise specified. Quarter-to-quarter dollar changes are differences between these published estimates. Percent changes are calculated from unrounded data and annualized.

This article was prepared by Daniel Larkins.

2. In this article, "consumer spending" is shorthand for the NIPA series "personal consumption expenditures," "government spending" is shorthand for "government consumption expenditures and gross investment," and "inventory investment" is shorthand for "change in private inventories."

3. Net foreign travel is "foreign travel by U.S. residents" less "expenditures in the United States by nonresidents." In the first quarter, expenditures by nonresidents turned down.

Table 1. Real Gross Domestic Product and Components

[Seasonally adjusted at annual rates]

	Change from preceding quarter (percent)				Contribution to percent change in real GDP (percentage points)				Share of current-dollar GDP (percent)

State and local	–0.8	2.1	–0.5	–2.6	–0.10	0.25	–0.06	–0.30	11.4
Addenda:									
Final sales of domestic product	3.3	8.3	3.4	3.9					

NOTE. The percent changes are from NIPA table 1.1.1, and the contributions to percent change are from NIPA table 1.1.2. The shares are from NIPA table 1.1.10. The addenda are from NIPA tables 1.4.1 and 1.7.1. See "Selected NIPA Tables," which begins on page D-2 of this issue.

Government spending increased 2.0 percent after little change, and it contributed 0.37 percentage point to GDP growth after subtracting 0.01 percentage point. Spending by the Federal Government stepped up; in contrast, spending by state and local governments decreased more than in the fourth quarter. National defense accounted for most of the step-up in Federal spending.

International trade (net exports) added 0.02 percentage point to GDP growth in the first quarter after subtracting 0.32 percentage point in the fourth. Imports increased less than in the fourth quarter. (Because imports are subtracted in the calculation of GDP, a slowdown in import growth is associated with a step-up in GDP growth.) The slowdown in imports was mainly accounted for by nonautomotive consumer and capital goods and by automotive products; in contrast, imports of petroleum turned up, and imports of industrial supplies and materials increased more than in the fourth quarter. Exports also increased less than in the fourth quarter; the largest contributor to the slowdown was nonautomotive capital goods, but most other major categories of goods and services exports also turned down or decelerated.

Inventory investment and residential and nonresidential fixed investment contributed less to GDP growth in the first quarter than in the fourth.

Inventory investment added 0.27 percentage point to GDP growth as the pace of inventory accumulation stepped up; in the fourth quarter, inventory investment added 0.71 percentage point, as inventory liquidation gave way to accumulation. Motor vehicle inventory investment slowed in the first quarter, while nonmotor vehicle inventory investment decreased about as much as in the fourth quarter.

Residential investment increased 2.1 percent, and it contributed 0.11 percentage point to GDP growth after contributing 0.40 percentage point. The slowdown was more than accounted for by single-family housing; in contrast, "other" residential structures (which includes brokers' commissions on house sales) decreased much less than in the fourth quarter, and multifamily structures decreased slightly less than in the fourth quarter.

Nonresidential fixed investment increased 7.2 percent, and it contributed 0.73 percentage point to GDP growth after contributing 1.08 percentage points. Investment in equipment and software increased less than in the fourth quarter, and investment in structures decreased more than in the fourth quarter. The increase in equipment and software was the eighth in a row; the decrease in structures was the 11th in the last 13 quarters. In equipment and software, transportation equipment decreased a little after a sharp increase, and information processing equipment and "other" equipment increased less than in the fourth quarter. In structures, decreases for commercial and health care, for manufacturing, and for "other" structures were bigger than in the fourth quarter. In contrast, investment in power and communication structures stepped up sharply in the first quarter.

NOTE. Percent change at annual rate from preceding quarter, based on seasonally adjusted estimates.

U.S. Bureau of Economic Analysis

Table 2. Change in Real Gross Domestic Product by Type of Product

[Seasonally adjusted at annual rates]

	Change from preceding quarter (percent)				Contribution to percent change in real GDP (percentage points)			
	2003			2004	2003			2004
	II	III	IV	I	II	III	IV	I
Gross domestic product	**3.1**	**8.2**	**4.1**	**4.2**	**3.1**	**8.2**	**4.1**	**4.2**
Goods	2.2	18.3	7.1	7.4	0.75	5.67	2.30	2.41
Services	3.6	2.1	2.8	3.8	2.08	1.27	1.61	2.18
Structures	2.8	13.9	2.4	–4.4	0.26	1.27	0.23	–0.42
Addenda:								
Motor vehicle output	2.1	26.6	3.7	–1.3	0.07	0.82	0.13	–0.04
Gross domestic product excluding motor vehicle output	3.1	7.6	4.2	4.4	3.01	7.39	4.01	4.21
Final sales of computers	32.8	93.4	32.3	7.1	0.25	0.65	.0.29	0.07
Gross domestic product less final sales of computers	2.8	7.6	3.9	4.1	2.83	7.56	3.85	4.09

NOTE. Percent changes are from NIPA table 1.2.1, and contributions to percent change are from NIPA table 1.2.2.

The advance estimates for the first quarter also show the following:

- Real disposable personal income increased 4.3 percent after increasing 0.5 percent.
- Real final sales of domestic product (GDP less the change in private inventories) increased 3.9 percent after increasing 3.4 percent.
- Real gross domestic purchases increased 4.0 percent after increasing 4.3 percent.
- The production of goods and of services stepped up, while the production of structures turned down (table 2).
- Motor vehicle output turned down. Excluding motor vehicles, real GDP increased 4.4 percent after increasing 4.2 percent.
- Final sales of computers slowed. Excluding these sales, real GDP increased 4.1 percent after increasing 3.9 percent.
- The personal saving rate increased from 1.7 percent to 1.9 percent.[4]

4. The personal saving rate is measured as personal saving as a percentage of current-dollar disposable personal income. Estimates of the *national* saving rate (measured as gross saving or net saving as a percentage of gross national income) will be available at the end of May along with the "preliminary" estimates of the NIPAs for the first quarter.

First-Quarter 2004 Advance NIPA Estimates: Source Data and Assumptions

The "advance" estimate for the first quarter is based on the following major source data; as more and better data become available, the estimates will be revised. (The number of months for which data were available is shown in parentheses.)

Personal consumption expenditures: Sales of retail stores (3), unit auto and truck sales (3), and consumers' shares of auto and truck sales (3);

Nonresidential fixed investment: Unit auto and truck sales (3), construction put in place (2), manufacturers' shipments of machinery and equipment other than aircraft (3), shipments of civilian aircraft (2), and exports and imports of machinery and equipment (2);

Residential investment: Construction put in place (2), single-family housing starts (3), and sales of new and existing houses (3);

Change in private inventories: Trade and nondurable manufacturing inventories (2), durable manufacturing inventories (3), and unit auto and truck inventories (3);

Net exports of goods and services: Exports and imports of goods and services (2);

Government consumption expenditures and gross investment: Federal outlays (3), state and local construction put in place (2), and state and local employment (3);

GDP prices: Consumer price indexes (3), producer price indexes (3), U.S. import and export price indexes (3), and values and quantities of petroleum imports (2).

BEA made assumptions for source data that were not available. Table A shows the assumptions for key series; a more comprehensive list is available on BEA's Web site at <www.bea.gov>.

Table A. Summary of Major Source Data and Assumptions for Advance Estimates, 2004:I

[Billions of dollars, seasonally adjusted at annual rates]

	2003			2004		
	October	November	December	January	February	March [1]
Private fixed investment:						
Nonresidential structures:						
Value of new total private construction put in place less residential (including improvements)	217.7	215.7	217.3	213.4	215.8	214.6
Equipment and software:						
Manufacturers' shipments of complete aircraft	25.9	33.1	27.1	26.6	26.8	29.5
Residential structures:						
Value of new residential construction put in place:						
Single family	324.4	332.8	339.3	339.2	337.6	345.4
Multifamily	34.7	34.6	34.1	33.5	33.8	34.6
Change in private inventories:						
Change in inventories for nondurable manufacturing	–3.4	4.6	–12.9	13.4	13.0	0.5
Change in inventories for merchant wholesale and retail industries other than motor vehicles and equipment	14.4	33.0	24.3	1.0	43.5	34.0
Net exports:[2]						
Exports of goods:						
U.S. exports of goods, international-transactions-accounts basis	739.9	764.7	755.5	742.6	780.7	788.9
Excluding gold	734.9	760.2	751.0	737.5	776.7	784.8
Imports of goods:						
U.S. imports of goods, international-transactions-accounts basis	1,304.9	1292.0	1330.6	1324.8	1347.6	1381.0
Excluding gold	1,300.9	1288.0	1327.3	1320.7	1343.1	1376.4
Net exports of goods	–565.1	–527.3	–575.1	–582.2	–566.8	–592.1
Excluding gold	–566.0	–527.7	–576.4	–583.2	–566.4	–591.6
Government:						
State and local:						
Structures:						
Value of new construction put in place	202.3	199.2	195.4	191.9	190.9	191.4

1. Assumption.
2. Nonmonetary gold is included in balance–of–payments–basis exports and imports but is not used directly in the estimation of NIPA exports and imports.

Prices

Inflation as measured by the price index for gross domestic purchases stepped up to 3.2 percent in the first quarter of 2004 from 1.3 percent in the fourth quarter of 2003 (table 3). The acceleration partly reflected an upturn in energy prices; as noted earlier, excluding the prices of food and energy, the price index increased 2.3 percent after increasing 1.5 percent (chart 2). A Federal pay raise for military and civilian personnel added about 0.3 percentage point to the first-quarter increase in prices.[5]

Prices of goods and services purchased by consumers increased 3.2 percent after increasing 1.0 percent. The price of energy goods and services turned up, while food prices decelerated. The price of all other consumer purchases increased 2.0 percent—the biggest increase in 1½ years.

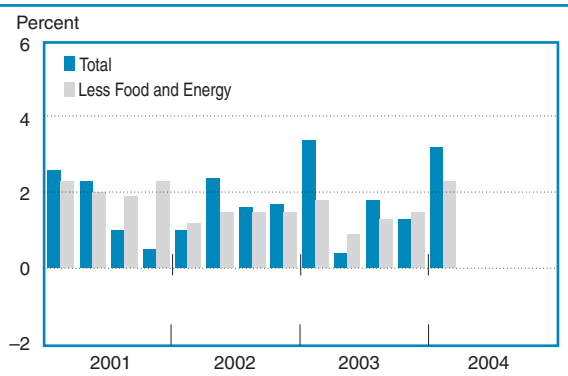
Prices of private nonresidential fixed investment increased 0.6 percent after increasing 1.8 percent. Prices of structures increased about as much as in the fourth quarter, and prices of equipment and software turned down.

Prices paid by government increased 4.8 percent after increasing 0.7 percent. The step-up, which was evident at both the Federal level and at the state and local level, partly reflected the upturn in energy prices; Federal prices also reflected the Federal pay raise.

The GDP price index, which measures the prices paid for goods and services produced in the United States, increased 2.5 percent, 0.7 percentage point less than the price index for gross domestic purchases. The smaller increase in the GDP price index reflected a smaller increase in export prices (which are included in the GDP price index) than in import prices (which are included in the price index for gross domestic purchases).

5. In the NIPAs, an increase in the rate of Federal employee compensation is treated as an increase in the price of employee services purchased by the Federal Government.

Chart 2. Gross Domestic Purchases Prices: Change From Preceding Quarter



NOTE. Percent change at annual rate from preceding quarter, based on seasonally adjusted index numbers (2000=100).

Less food and energy	0.9	1.3	1.5	2.3	0.77	1.13	1.30	2.00
Personal consumption expenditures:								
Food	2.4	2.5	4.0	2.6				
Energy goods and services	–8.6	12.3	–9.5	26.9				
Less food and energy	0.8	1.0	1.2	2.0				
Gross domestic product	1.1	1.6	1.5	2.5				

NOTE. Most percent changes are from NIPA table 1.6.7; percent changes for personal consumption expenditures on energy goods and services and for personal consumption expenditures excluding food and energy are calculated from index numbers in table 2.3.4. Contributions to percent change are from table 1.6.8.

Personal Income

Real disposable personal income (DPI) increased 4.3 percent in the first quarter of 2004 after increasing 0.5 percent in the fourth quarter of 2003 (chart 3 and table 4). The acceleration reflected a step-up in current-dollar DPI (defined as personal income less personal current taxes) that was partly offset by a step-up in the implicit price deflator for personal consumption expenditures (which is used to deflate DPI).

Personal income, which is measured only in current dollars, increased $128.9 billion (or 5.6 percent) after increasing $107.6 billion (4.7 percent).

Employee compensation, transfers, and proprietors' income increased more than in the fourth quarter; rental income and interest income increased less than in the fourth quarter.

Employee compensation increased $95.2 billion, almost twice as much as in the fourth quarter. A step-up in wage and salary disbursements was broadly based; all major industry groups contributed. In government, the Federal pay raise contributed $5.2 billion (at an annual rate) to the step-up. A step-up in supplements to wages and salaries reflected employer contributions for government social insurance and for private health insurance.[6]

Personal current transfer receipts increased $19.3 billion after increasing $5.1 billion. The step-up mainly reflected an upturn in benefits received from state and local governments (primarily Medicaid) and an acceleration in benefits received from the Federal Government. The step-up in Federal benefits partly reflected cost-of-living adjustments to social security payments;

6. Employer contributions for social insurance do not affect personal income. They are added in "supplements to wages and salaries" and subtracted in "contributions for government social insurance."

Chart 3. Selected Personal Income and Saving Measures

NOTE. Dollar levels are from NIPA tables 2.1 and 2.1B.
IVA Inventory valuation adjustment
CCAdj Capital consumption adjustment

earned income tax credits also stepped up. In contrast, unemployment insurance benefits decreased more than in the fourth quarter.

Proprietors' income increased $20.0 billion after increasing $13.4 billion. The step-up mainly reflected an upturn in the commissions earned by security and commodity brokers and a smaller decrease in the commissions earned by real estate brokers.

Rental income increased $5.4 billion after increasing $26.0 billion. The slowdown primarily reflected an upturn in expenses. Mortgage closing costs (which are subtracted in the calculation of rental income) decreased less than in the fourth quarter.

Personal interest income increased $0.7 billion after increasing $8.7 billion. The deceleration primarily reflected decreasing interest rates.

Personal current taxes decreased $26.5 billion after increasing $76.0 billion. The downturn largely reflected a downturn in Federal nonwithheld taxes that reflects estimates from the Treasury Department for 2004 and actual tax collections and refunds through late April.

Fixed Assets and Consumer Durable Goods

Preliminary Estimates for 2002

Revised Estimates for 1925–2001

By Paul R. Lally

As part of the comprehensive revision of the national income and product accounts (NIPAs), the Bureau of Economic Analysis (BEA) has released preliminary estimates of fixed assets and consumer durable goods for 2002 and revised estimates for 1925–2001. These estimates cover the net stock of equipment and software and of structures owned by business and by government and the net stock of durable goods owned by consumers.

The revised estimates reflect the following:

- The revised estimates of new investment, of sales of used assets between sectors, and of prices that were released earlier as part of the comprehensive revision.
- Key statistical improvements from the comprehensive NIPA revision, including longer service lives for aircraft, separate estimates of depreciation for light trucks, and an updated depreciation schedule for autos.
- Changes in the classification of equipment and software by type of asset and in the classification of government structures and new NIPA aggregate measures for private structures.

The estimates of the net stock of fixed assets and consumer durable goods are presented in two valuations—current cost and real cost. The current-cost valuation includes the effects of both price changes and changes in the physical volume of assets, but the real-cost valuation, which is measured in terms of chain-type quantity indexes, reflects only changes in physical volume or real changes.[1]

For 1925–2002, the net stock at current cost grew at an average annual rate of 6.3 percent, and the net stock at real cost grew at an average annual rate of 2.9 percent (table A). Real-cost net stock grew the fastest in 1947–73, when it rose at an average annual rate of 3.6 percent. Since 1973, growth has slowed; in 1973–92 and in 1992–2002, real-cost net stock increased at an average annual rate of 2.7 percent. Nonresidential equipment and software, consumer durable goods, and state and local government grew more rapidly in 1992–2002 than in 1973–92; nonresidential structures and Federal Government grew more slowly in 1992–2002 than in 1973–92, and residential grew at the same pace in both periods. In 1992–2002, nonresidential equipment and software increased at an average annual rate of 4.7 percent after increasing 3.8 percent in 1973–92; consumer durable goods increased at an average annual rate of 5.0 percent after increasing 4.2 percent in 1973–92, and state and local government increased 2.3 percent after increasing 2.1 percent. In 1992–2002, nonresidential structures increased 1.6 percent after increasing 2.7 percent in 1973–92, and Federal Government decreased 0.2 percent after increasing 1.3 percent. In both periods, residential increased 2.4 percent.

Statistical improvements

The estimates of the net stock of fixed assets and consumer durable goods incorporate three key statistical improvements.[2]

1. See J. Steven Landefeld, Brent R. Moulton, and Cindy M. Vojtech, "Chain-Dollar Indexes: Issues, Tips on Their Use, and Upcoming Changes," Survey of Current Business 83 (November 2003): 8–16.

2. See Carol E. Moylan and Brooks B. Robinson, "Preview of the 2003 Comprehensive Revision of the National Income and Product Accounts: Statistical Changes," Survey 83 (September 2003): 17–32.

Table A. Net Stocks of Fixed Assets and Consumer Durable Goods
Average Annual Rates of Change Over Selected Periods
[Percent]

	1925–2002	1925–1947	1947–1973	1973–1992	1992–2002
	Current cost				
Fixed assets and consumer durable goods	6.3	4.6	6.6	7.8	4.9
Private	6.3	3.9	6.7	8.1	5.1
Nonresidential	6.2	3.4	7.0	8.2	4.6
Equipment and software	6.6	3.3	7.9	8.7	4.4
Structures	6.0	3.5	6.6	7.9	4.8
Residential	6.3	4.3	6.5	7.9	5.6
Government	6.7	7.8	6.0	6.8	4.4
Federal	6.7	11.9	4.0	6.2	2.1
State and local	6.7	5.2	7.7	7.1	5.2
Consumer durable goods	6.1	3.1	7.2	8.0	4.5
	Real cost				
Fixed assets and consumer durable goods	2.9	2.1	3.6	2.7	2.7
Private	2.7	1.0	3.7	2.8	2.6
Nonresidential	2.8	1.0	3.9	3.1	2.8
Equipment and software	3.8	1.4	5.0	3.8	4.7
Structures	2.3	0.8	3.2	2.7	1.6
Residential	2.5	1.1	3.5	2.4	2.4
Government	3.3	5.9	2.6	1.9	1.6
Federal	3.5	10.4	0.5	1.3	–0.2
State and local	3.3	3.0	4.3	2.1	2.3
Consumer durable goods	4.1	1.3	5.6	4.2	5.0

New service life for aircraft. Recent research at BEA indicated that the expected service lives for private aircraft in the industries of air transportation, depository and nondepository institutions, insurance carriers, and business services should be lengthened. Accordingly, the expected service lives for these aircraft for 1960 forward were extended to 25 years from the current 20 years, and the geometric depreciation rate of 0.0825 for aircraft in these industries was replaced by a new rate of 0.0660.

Separate estimates of light trucks. The estimates of investment in light trucks that are used in the private sector were prepared for the first time as part of the NIPA comprehensive revision. The estimates of investment in "light trucks (including utility vehicles)" for 1992 forward are now available. Previously, the estimates for light trucks were included in "trucks, buses, and truck trailers." Light trucks were assigned a geometric depreciation rate of 0.1925 and an expected service life of 17 years.

Updated depreciation schedule for autos. The estimates of depreciation for autos that are used in the private sector are based on an updated depreciation schedule, beginning with the estimates for 1991. On average, the estimates for autos now reflect a longer depreciation schedule that is based on a longer service life.

Changes in classification

As part of the comprehensive NIPA revision, the following changes were made:

- Federal nondefense and state and local government structures are now classified by function rather than by type.
- Estimates of the net stock of private fixed assets by type of asset now include four new components for the types of nonresidential structures: Commercial and health care, manufacturing, power and communication, and "other structures."[3] A new classification system for nonresidential structures will be incorporated in the next comprehensive revision of fixed assets.
- The improved classification of equipment and software now includes medical equipment and instruments, nonmedical instruments, and "light trucks (including utility vehicles)" as types of assets.

Presentation of the revised estimates

Tables 1–15 present the revised estimates of fixed assets and consumer durable goods. All the odd-numbered tables except table 15 present current-cost estimates; the even-numbered tables present real estimates in chain-type quantity indexes.

Tables 1 and 2 present estimates of the net stock of fixed assets and consumer durables. Tables 3 and 4 present the net stock of private fixed assets by type of asset; these tables have been redesigned to reflect the changes in NIPA tables 5.4.5A and 5.5.5.

Tables 5 and 6 present the net stock of private fixed assets by industry. Tables 7 and 8 present the net stock of private nonresidential fixed assets by selected industry group and by legal form of organization. Tables 9 and 10 present the net stock of residential fixed assets by type of owner, by legal form of organization, and by tenure group.

Tables 11 and 12 present the net stock of government fixed assets; these tables have been redesigned to reflect the new classification of government structures by function (NIPA table 5.8.5B). Tables 13 and 14

Data Availability

The historical estimates of net stock of fixed assets and consumer durable goods are available for free on BEA's Web site at <www.bea.gov>. The estimates of the net stock of private fixed assets by industry are available for 1947 forward. The net stock of fixed assets and consumer durable goods in chained (2000) dollars are available for 1990 forward. All the other estimates are available for 1925 forward.

As part of the 2004 annual NIPA revision, BEA will convert the estimates of net stock by industry for 1987 forward to the 1997 North American Industry Classification System. These estimates will then be posted on our Web site.

Acknowledgments

The estimates of fixed assets and consumer durable goods were prepared by the National Income and Wealth Division and the Government Division of the Bureau of Economic Analysis. The estimates of private fixed assets and consumer durable goods were prepared under the direction of Paul R. Lally, assisted by Randal T. Matsunaga, Michael D. Glenn, Nadia F.P. Sadee, and Michael T. Cusick. The estimates of government fixed assets were prepared under the direction of D. Timothy Dobbs and Steven Payson, assisted by Jennifer A. Bennett and Charles S. Robinson. Ross Metzger prepared the tables for desktop publishing.

Brent R. Moulton, Associate Director for National Economic Accounts, Carol E. Moylan, Chief of the National Income and Wealth Division, and Brooks B. Robinson, Chief of the Government Division, provided overall supervision.

3. See Nicole Mayerhauser, Shelly Smith, and David F. Sullivan, "Preview of the 2003 Comprehensive Revision of the National Income and Product Accounts: New and Redesigned Tables," SURVEY 83 (August 2003): 7–31.

present the net stock of consumer durable goods. Table 15 presents estimates in chained (2000) dollars for the net stock of fixed assets and consumer durable goods.

Tables 1–15 follow.

1. Excludes software "embedded" or bundled in computers and other equipment.
2. Consists of office buildings, except those constructed at manufacturing sites and those constructed by power utilities for their own use. Also includes medical buildings.
3. Consists of stores, restaurants, garages, service stations, warehouses, beauty and trade schools, mobile structures, and other buildings used for commercial purposes.
4. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.
5. Consists primarily of streets, dams and reservoirs, sewer and water facilities, parks, and airfields.
6. Consists primarily of dormitories and of fraternity and sorority houses.
n.e.c. Not elsewhere classified

1. Excludes software "embedded" or bundled in computers and other equipment.
2. Consists of office buildings, except those constructed at manufacturing sites and those constructed by power utilities for their own use. Also includes medical buildings.
3. Consists of stores, restaurants, garages, service stations, warehouses, beauty and trade schools, mobile structures, and other buildings used for commercial purposes.
4. Consists of hotels and motels, buildings used primarily for social and recreational activities, and buildings not elsewhere classified, such as passenger terminals, greenhouses, and animal hospitals.
5. Consists primarily of streets, dams and reservoirs, sewer and water facilities, parks, and airfields.
6. Consists primarily of dormitories and of fraternity and sorority houses.

n.e.c. Not elsewhere classified

Comprehensive Revision of the NIPAs
Newly Available Tables

As part of the comprehensive revision of the national income and product accounts (NIPAs), this report presents the following newly available NIPA tables: 5.9, 7.12, and 7.19.

The February 2004 issue of the SURVEY OF CURRENT BUSINESS included an article that described the revision and an extensive set of NIPA tables. The March and April issues presented newly available tables. The remaining tables are scheduled to be published in upcoming issues of the SURVEY.

Table 5.9. Changes in Net Stock of Produced Assets (Fixed Assets and Inventories)

[Billions of dollars]

	Line	1999	2000	2001	2002
Opening balance					
Produced assets	1	**25,176.8**	**26,816.2**	**28,583.2**	**30,119.6**
Fixed assets	2	23,829.9	25,374.1	27,047.3	28,662.2
Private	3	18,728.9	19,975.2	21,334.6	22,684.6
Government	4	5,101.1	5,398.9	5,712.7	5,977.6
Private inventories [1]	5	1,346.8	1,442.2	1,535.9	1,457.3
Accumulation of produced assets					
Gross fixed investment	6	**1,845.5**	**1,983.5**	**1,960.3**	**1,921.0**

Government	42	80.0	83.0	73.4	–4.8
Private inventories [1]	43	–4.3	2.6	–63.1	8.5
Closing balance					
Produced assets [11]	44	**26,816.2**	**28,583.2**	**30,119.6**	**31,131.7**
Fixed assets	45	25,374.1	27,047.3	28,662.2	29,631.5
Private	46	19,975.2	21,334.6	22,684.6	23,412.9
Government	47	5,398.9	5,712.7	5,977.6	6,218.6
Private inventories [1]	48	1,442.2	1,535.9	1,457.3	1,500.2
Addenda:					
Intersectoral auto valuation adjustment [12]	49	6.0	2.4	6.1	13.7
Brokers' commissions on sale of nonresidential used structures and dealers' margins on used equipment	50	12.3	12.7	12.7	12.1
Electric plants put in place less electric plants put in use [13]	51	0.7	0.2	0.2	0.4
Private	52	0.5	0.1	0.1	0.1
Government	53	0.2	0.1	0.1	0.3
Abandoned electric plants [14]	54	0.0	0.0	0.0	0.0

1. Estimates of government inventories are not available.
2. Private fixed investment shown in table 5.2.5, line 7.
3. Gross government investment shown in table 5.2.5, line 23.
4. Consists of intersectoral auto valuation adjustment (line 49); brokers' commissions on sale of nonresidential used structures and dealers' margins on used equipment (line 50); and private electric plants put in place less electric plants put in use (line 52).
5. Consists of government electric plants put in place less electric plants put in use (line 53).
6. Equals consumption of fixed capital shown in table 1.7.5, line 5 less the other changes in volume of private fixed assets (line 29) and government enterprises fixed assets (line 32).
7. Change in private inventories shown in table 1.1.5, line 12. Inventory estimates are not adjusted for disaster losses, theft, obsolescence, or infestation.
8. Consists of disaster losses. Structures and equipment destroyed are valued at current cost.
9. Consists of disaster and war losses. Structures and equipment destroyed are valued at current cost.
10. Neutral holding gains are the gains derived from holding an asset if the price of an asset changed in the same proportion as the general price level. The chain-type price index for gross domestic purchases is used as a measure for the general price level.
11. Equals lines 1+6–15–18+27–28+33.
12. Used autos are valued at acquisition prices less depreciation in the estimates of the stocks of private fixed assets and consumer durable goods; net purchases of used autos by business from consumers are valued at wholesale prices in gross fixed investment.
13. This adjustment reflects a timing difference between fixed investment and the stock of produced assets. In investment, the value of structures and equipment for electric plants is recorded on a put-in-place basis; in the stocks, the investment is recorded when the plants are put in use.
14. Consists of the value of abandoned nuclear power plants that were never put in use. The investment in these plants is included in gross fixed investment, but does not enter the opening or closing balances—it is included in the adjustments to gross fixed investment shown in line 15.

Excluding imputations (218–219)	228	7,241.4	7,820.1	8,054.0	8,198.5

1. Residential dwellings owned and used by nonprofit institutions serving households are included in owner-occupied housing categories.

2. Includes services furnished without payment by financial intermediaries except life insurance carriers to government employee retirement plans.

3. Classified as a service in exports, and as an income payment to the rest of the world.

4. Classified as a service in exports, and as an income receipt from the rest of the world.

5. For general government employees, recorded as compensation of employees (wages and salaries) and as a sale; does not affect government consumption expenditures. Similar payments for employees of government enterprises are not included in government consumption expenditures; they are deducted in the calculation of the surplus of government enterprises.

6. Health insurance premiums paid by employers are included in the calculation of the "health insurance" category of personal consumption expenditures (PCE); life insurance premiums paid by employers are included in the calculation of the "expenses of handling life insurance and pension plans" category of PCE.

7. Consists of the programs for which a social insurance fund is imputed, and for which contributions are set equal to benefits paid. These payments are funded directly out of the current budget. The specific programs consist of workers' compensation, unemployment insurance, and medical services for the dependents of active duty military personnel at nonmilitary facilities. Source data are not available for the corresponding treatment for similar state and local government programs. Similar payments for employees of government enterprises are not included in government consumption expenditures; they are deducted in the calculation of the surplus of government enterprises.

8. Consists of owner-occupant purchases of new single-family dwellings, including manufactured homes, expenditures on improvements, and payments of commissions on new and existing residential dwellings, less sales of dwellings to government. The series is calculated from the investment data prepared as part of BEA's capital stock estimates. It differs from the investment data shown in table 5.4.5 because the series shown in that table reflect total purchases by private business.

9. Excludes investment by nonprofit institutions serving households in residential properties, which is included in owner-occupant investment (see footnote 1) and in sales of existing structures to governments. The series is calculated from the investment data prepared as part of BEA's capital stock estimates. It differs from the investment data shown in table 5.4.5 because the series shown in that table reflect total purchases by private business.

10. The consumption of fixed capital (CFC) of government enterprises is not included in government consumption expenditures; it is deducted in the calculation of the current surplus of government enterprises and is recorded as part of total government CFC.

11. Includes gross investment of government enterprises.

NOTE. "Imputations" are transactions recorded in the national income and product accounts that are not transactions of the market economy. In this table, the imputations shown in the "specific imputations" section are those that affect gross domestic product (GDP). In table 7.11, imputed interest paid by life insurance carriers (line 46) consists of the property incomes earned on life insurance and pension reserves. These incomes are considered to be incomes received by persons and not by the insurance carriers; this reclassification is not considered an imputation for purposes of table 7.12, because it does not affect GDP.

AGI of IRS (line 17) as a percentage of BEA-derived AGI (line 16)	20	89.3	89.3	88.4	.....

1. Consists of the imputations included in personal income shown in table 7.12 except for employer contributions for health and life insurance (line 174). In table 7.19, these premiums are included in line 4.

2. Consists of income earned by low-income individuals who are not required to file income tax returns, of unreported income that is included in the NIPA measure, and of gross errors and omissions in lines 2 through 15. Also includes the net effect of errors in the IRS adjusted gross income (line 17) and NIPA personal income (line 1) measures. Such errors can arise from the sample used by IRS to estimate line 17 and from the source data used by BEA to estimate line 1.

Comprehensive Revision of State Personal Income

Preliminary Estimates for 2003

Revised Estimates for 1969–2002

By Robert L. Brown, G. Andrew Bernat, Jr., and Adrienne T. Pilot

ON April 27, 2004, the Bureau of Economic Analysis (BEA) released the initial results of the latest comprehensive revision of quarterly and annual estimates of state personal income; the results of the previous comprehensive revision of state personal income were released in May 2000. BEA released revised estimates of state personal income and per capita personal income for 1969–2002, preliminary estimates for 2003, and preliminary estimates of state personal income for the fourth quarter of 2003. This revision incorporates changes due to the comprehensive revision of the national income and product accounts (NIPAs). The timing of this release represents a significant acceleration in the availability of state personal income estimates that are consistent with the comprehensive revision of the NIPAs.[1]

The major highlights are the following:

- In 2003, per capita personal income for the Nation was $31,632, up 2.3 percent, nearly double the growth rate in 2002, but slower than the rate of growth during most of the 1990s.
- The pickup in per capita income growth was widespread; per capita income in 44 states grew faster in 2003 than in 2002.
- In 2003, Connecticut, at $43,173, has the highest per capita personal income. Mississippi, at $23,448, has the lowest per capita personal income.
- The revisions to state personal income are generally small and mixed in direction.
- Over the current recovery, the effect of the comprehensive revision on the growth rates of state personal income was generally small.

This article presents a summary of the revised estimates of state personal income and per capita personal income for 1969–2002 and preliminary estimates for 2003 and for the fourth quarter of 2003; for information on the availability of revised estimates that are more detailed than those presented in tables 1–7 at the end of this article, see the box "Data Availability" on page 39. This article also describes the sources of the revisions and the effects of the revisions on the estimates.

1. In the previous comprehensive revision, the NIPAs were released in October 1999, and the state personal income estimates that were consistent with the NIPAs were released a little less than 7 months later in May 2000. This time, the state personal income estimates were released a little more than 4 months after the December 2003 release of the NIPAs.

Personal Income and Per Capita Personal Income for 2003

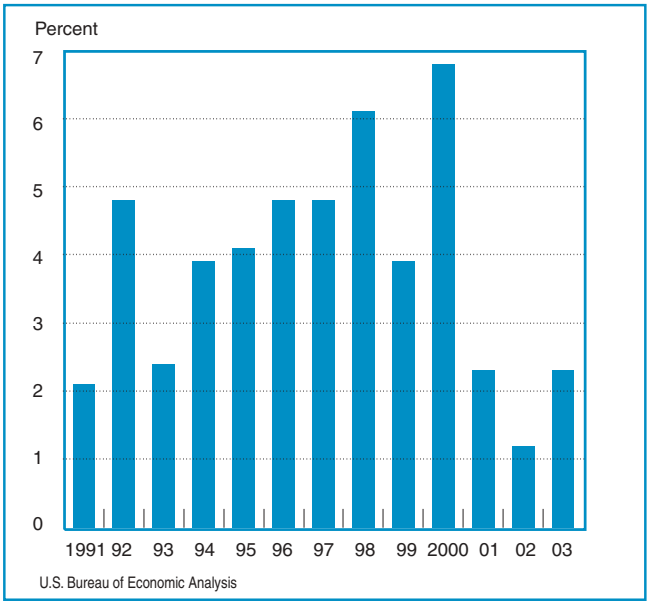
Per capita income—the average income received by persons—grew 2.3 percent in 2003. This growth is nearly double the 1.2-percent growth in 2002 and equal to the growth of 2001. However, the growth in per capita income in 2003 is slower than the growth rates during the last half of the 1990s, when the growth rates ranged from 3.9 percent to 6.1 percent (chart 1). The pickup from 2002 was widespread, as per capita income in 44 states grew faster in 2003 than in 2002. The pickup in per capita income growth was due to an acceleration in personal income growth to 3.4 percent, while population growth was unchanged at 1.0 percent (per capita income is personal income divided by population). Connecticut led the Nation with per capita income of $43,173.

Personal income

Personal income for the Nation grew 3.4 percent in 2003 after increasing 2.3 percent in 2002. The growth in 2003 was relatively low by historical standards, but it was a turnaround after 2 consecutive years of decelerating growth.

The acceleration in personal income growth in 2003, which is only available in current dollars, re-

Chart 1. U. S. Per Capita Personal Income Growth



flected an acceleration in net earnings by place of residence. Personal current transfer receipts grew more slowly in 2003, partly reflecting the continued economic recovery.[2] Dividends, interest, and rent also grew more slowly in 2003 than in 2002.

Personal income growth by component. Net earnings for the Nation grew 3.4 percent in 2003 (table A). Net earnings increased 1.4 percent in 2002 and 3.0 percent in 2001. Earnings accelerated in 47 states and the District of Columbia; in 2002, earnings accelerated in only 8 states.

Transfer receipts grew 6.7 percent in 2003, down from the 8.6-percent growth in 2002. Receipts from

2. Personal current transfer receipts consists of income payments to persons for which no current services are performed and of net insurance settlements. It is the sum of "government social benefits" and "current transfer receipts from business (net)." Government social benefits—formerly, transfer payments to persons from government—includes benefits from government social insurance funds and from certain other programs.

Table A. Personal Income by Component for States and Regions, 2002–2003

[1] Net earnings is earnings by place of work—the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income—less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

NOTE. Estimates may not add to totals because of rounding.

unemployment benefits increased 4.2 percent for the Nation, but they decreased in 11 states and the District of Columbia. All other transfer receipts increased 6.8 percent.

Dividends, interest, and rent grew 0.4 percent in 2003 after a 0.9-percent increase in 2002. Dividends growth accelerated from 6.7 percent in 2002 to 8.2 percent; both personal interest income and rental income decreased.

Earnings growth by industry. Nationally, earnings by place of work grew 3.4 percent in 2003 (table B). This growth was faster than in either 2001 (3.1 percent) or 2002 (1.5 percent). Government earnings, especially military, contributed the most to earnings

[1] Earnings by place of work is the sum of wage and salary disbursements (payrolls), supplements to wages and salaries, and proprietors' income.

growth in 2003; financial activities, and education and health services also contributed (table C). The contributions of all other industries were substantially smaller; earnings decreased only in durable goods manufacturing.

The growth in government earnings contributed the most to total earnings growth in 24 states and the District of Columbia. Financial activities contributed the most to growth in 10 states, and education and health services contributed the most to growth in 8 states. In both North Dakota and South Dakota, earnings growth exceeded 11 percent, as strong growth in farm earnings boosted

Table C. Contributions to Percent Change in Earnings for States and Regions, 2002–2003

[1] Earnings by place of work is the sum of wage and salary disbursements (payrolls), supplements to wages and salaries, and proprietors' income.

growth in the natural resources and mining sector.

Per capita personal income

For the Nation, per capita personal income grew 2.3 percent, as personal income grew 3.4 percent and population grew 1.0 percent (table D). This growth was nearly twice as fast as in 2002.

Five of the 10 states with the fastest growing per capita personal income, led by North Dakota and South Dakota, were in the Plains region (chart 2). The most important contributor to earnings growth in these five states was natural resources and mining, primarily farming.

The growth in per capita income resulted in minor

Table D. Per Capita Personal Income, Personal Income, and Population for States and Regions, 2002–2003

Acknowledgments

The comprehensive revision of state personal income was prepared by the Regional Economic Measurement Division under the direction of Robert L. Brown, Chief. John W. Ruser, Associate Director for Regional Economics, provided general guidance. The preparation of the revised estimates was a divisionwide effort.

The estimates of nonfarm wages and salaries and supplements to wages and salaries were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, John D. Laffman, Michael G. Pilot, Mauricio Ortiz, John A. Rusinko, James M. Scott, and Elizabeth F. Stell. Contributing staff members were Peter Battikha, Michael L. Berry, Kristin M. Chambliss, Susan P. Den Herder, Lisa B. Emerson, Tina C. Highfill, Mark W. Hodgins, Russell C. Lusher, Paul K. Medzerian, Michael Phillips, Jesse M. Young, and Jaime Zenzano.

The quarterly estimates of state personal income and the annual estimates of farm wages and salaries, farm supplements to wages and salaries, farm proprietors' income, property income, personal current transfer receipts, contributions for government social insurance, and the adjustment for residence were prepared by the Regional Income Branch under the supervision of James M. Zavrel, Chief. Major responsibilities were assigned to Charles A. Jolley, Carrie L. Litkowski, Jeffrey L. Newman, James P. Stehle, and Matthew A. von Kerczek. Contributing staff members were Suet M. Boudhraa, Elaine M. Briccetti, Daniel R. Corrin, Melissa A. Farbman, Katherine E. Harper, Toan A. Ly, W. Tim McKeel, Troy C. Watson, and Marianne A. Ziver.

The estimates of personal current tax receipts were prepared by Ann E. Dunbar under the supervision of Robert L. Brown.

The public use tabulations and data files were assembled and the tables were prepared by the Regional Economic Information System Branch under the supervision of Kathy A. Albetski, Chief. Major responsibilities were assigned to Gary V. Kennedy. Contributing staff members were H Steven Dolan, Michael J. Paris, Catherine M. Sanchez, Alison M. Skinner, Callan S. Swenson, Monique B. Tyes, and Mary C. Williams.

The section of this article on the revised estimates was written by Robert L. Brown with assistance from Adrienne T. Pilot. The section on the preliminary quarterly and annual estimates of state personal income for 2003 was written by G. Andrew Bernat, Jr., of the Regional Economic Analysis Division.

the highest per capita income in 2003, has been the top state since 1986, and New Jersey, Massachusetts, Maryland, and New York have been in the top 10 since 1983.

Similarly, most of the states with the lowest per capita incomes in 2003 have been in the lowest quintile in recent years. Eight states have been in the bottom 10 since 1997.

Fourth Quarter 2003 Personal Income

Personal income in the Nation grew 1.2 percent in the fourth quarter of 2003, the same as in the third quarter and faster than the 1.1-percent growth in the second quarter and the 0.8-percent growth in the first quarter of 2003 (table E, chart 3). All 10 of the fastest growing states had above-average growth in net earnings, and 6

U.S. Bureau of Economic Analysis

Personal Income in the NIPAs and State Personal Income

The estimates of personal income in the national income and product accounts (NIPAs) mainly differ from the state estimates of personal income because of the differing treatment of the income of U.S. residents who are working abroad and the treatment of the income of foreign residents who are working in the United States. The national total of the state estimates of personal income consists of only the income earned by persons who live in the United States and of foreign residents who work in the United States.[1]

The measure of personal income in the NIPAs is broader. It includes the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents on foreign assignment for less than a year, and it includes the investment income that is received by Federal retirement plans of Federal workers stationed abroad. Earnings of foreign residents are included only if they live and work in the United States for a year or more.

The annual estimates of personal income in the NIPAs also differ from the national totals of state personal income because of differences in the timing of the availability of source data. For example, farm proprietors' income in the NIPAs for 2002 was $2.6 billion higher than in state personal income, because the state estimates of farm proprietors' income incorporated revised USDA data that were not available until after the national estimate was released in the comprehensive NIPA revision.

1. See "State Personal Income, 1996–2001" (unpublished, September 2002); go to <www.bea.gov>, select Methodologies, then Regional.

National and State Estimates of Personal Income

[Billions of dollars]

	2001	2002	2003
Personal income in the NIPAs	**8,429.7**	**8,713.1**	**8,910.3**

Coverage differences	**9.5**	**10.5**	**14.0**
Federal workers abroad	15.2	16.8	20.6
Wage and salary disbursements	10.1	11.4	13.9
Supplements to wages and salaries [1]	5.1	5.6	6.9
Dividends, interest, and rent [2]	1.0	1.0	1.2
Less: Contributions for government social insurance	1.0	1.2	1.4
Rest-of-the-world difference [3]	–5.7	–6.3	–6.6
Use of more current source data	**–1.9**	**–0.4**	**–3.7**
Wage and salary disbursements	0.0	–0.1	–1.6
Farm proprietors' income	–2.1	–3.1	–2.6
Personal current transfer receipts	0.2	2.8	0.5
Equals: State personal income	**8,422.1**	**8,703.0**	**8,900.0**

1. Consists of employer contributions for government social insurance and for employee pension and insurance funds for Federal workers stationed abroad.
2. Consists of the investment income received by Federal retirement plans that is attributed to Federal workers stationed abroad.
3. Consists of the wages and salaries received by U.S. residents working abroad and foreign residents working in the United States for less than a year.

of the 10 had above-average growth in dividends, interest, and rent. All 10 of the slowest growing states had below-average growth in net earnings. In Washington, the only state with a decrease in personal income in the fourth quarter, net earnings decreased 2.2 percent, as earnings in the information sector decreased 33.3 percent (table F).

Sources of the Revisions

The revised estimates of state personal income incorporate a number of definitional and statistical improvements as part of the comprehensive NIPA

1. Net earnings is earnings by place of work—the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income—less contributions for government social insurance plus an adjustment to convert earnings by place of work to a place-of-residence basis.

NOTE. Estimates may not add to totals because of rounding.

revision; these improvements are designed to better measure the ever-changing U.S. economy. The improvements to the NIPAs were previewed last year in a series of articles in the SURVEY OF CURRENT BUSINESS, and the results of the comprehensive NIPA revision were described in an article in February. [3]

The following changes in the sources and methods that are used to prepare the state estimates of personal income are described: The definitional and classificational changes that can be estimated by state, the statistical changes to the national estimates that can be replicated at the state level, and the improvements to the state-level sources and methods for other components of personal income. Many of the methodological changes that were incorporated into the national estimates of personal income in the NIPAs involve detailed estimation that cannot be replicated at the state level, because the underlying source data are not available for states. However, these changes are implicitly incorporated into the state estimates through the use of the national estimates as control totals.

Changes in definitions and classifications

Changes in definitions and classifications are those changes that affect the conceptual content of the components of the NIPA summary accounts in order to more accurately portray the evolving U.S. economy. The changes that are discussed here are those that affect personal income and disposable personal income. These changes have been organized into those that have been implemented to promote consistency and integration with international guidelines and all other definitional and classificational changes.

Consistency with international guidelines

Many of the changes incorporated in the comprehensive revision of the NIPAs improve their consistency with the principal international guidelines for the national accounts that are provided in the *System of National Accounts 1993*.[4] As a result of these changes, the NIPA classifications of various transactions will be more in alignment with the classifications used in the *SNA 1993*. These changes modify the presentation of personal income—including some of the nomenclature—but they do not affect the aggregate of personal income. However, the reclassification of personal nontax payments affects disposable personal income, which increases because of the removal of personal nontax payments from personal current taxes.

BEA supports the goal of international harmonization of its national accounts, and improving the consistency of its accounts with the *SNA 1993* remains an element of BEA's mission of producing accurate, relevant, and timely statistics. However, BEA has retained several important NIPA aggregates, such as personal income and corporate profits, that do not appear in the *SNA 1993*, because BEA must also consider the needs of the U.S. user community.

The most significant changes to components of personal income to promote consistency with the *SNA 1993* are those to employer contributions for government social insurance, miscellaneous compensation of employees, and personal nontax payments.

Employer contributions for government social insurance. In the new presentation of personal income, employer contributions for government social insurance is included as a component of supplements to wages and salaries, which also includes employer contributions for employee pension and insurance funds (previously called other labor income). However, the change in presentation does not affect personal income or net earnings by place of residence, because employer contributions for government social insurance is also part of contributions for government social insurance, which includes employee and self-employed contributions for government social insurance and which is deducted in the calculation of personal income.[5] Although personal income is not affected by this reclassification, total earnings by place of work and contributions for government social insurance are revised upward; for 2002, they are revised up by $363.4 billion.[6]

Employer contributions for government social insurance consists of the following: Employer contributions to the social insurance funds of old-age, survivors, disability, and health insurance; unemployment insurance; railroad retirement; Federal workers' compensation; military medical insurance; the Pension Benefit Guaranty Corporation; state-administered temporary disability insurance; and state-administered workers' compensation. The estimates of employer contributions for government social insurance are developed for each program by industry. The total for all

Seskin and Daniel Larkins, "Improved Estimates of the National Income and Product Accounts for 1929–2002: Results of the Comprehensive Revision," SURVEY 84 (February 2004): 7–29; Carol E. Moylan and Brooks B. Robinson, "A Preview of the 2003 Comprehensive Revision of the National Income and Product Accounts: Statistical Changes," SURVEY 83 (September 2003): 17–32; Nicole Mayerhauser, Shelly Smith, and David F. Sullivan, "A Preview of the 2003 Comprehensive Revision of the National Income and Product Accounts: New and Redesigned Tables," SURVEY 83 (August 2003): 7–31; and Brent R. Moulton and Eugene P. Seskin, "A Preview of the 2003 Comprehensive Revision of the National Income and Product Accounts: Changes in Definitions and Classifications," SURVEY 83 (June 2003): 17–34.

4. See Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations, and the World Bank, *System of National Accounts 1993* (*SNA 1993*) (Brussels/Luxembourg, New York, Paris, and Washington, DC, 1993).

5. As part of the comprehensive NIPA revision, personal contributions for social insurance has been renamed "employee and self-employed contributions for government social insurance."

6. In state personal income, total earnings now consists of wage and salary disbursements, supplements to wages and salaries, and proprietors' income. Previously, total earnings consisted of wage and salary disbursements, other labor income, and proprietors' income.

of the programs is included in contributions for government social insurance. The sources are described below.

The employer contributions for old-age, survivors, and disability insurance and for hospital insurance for state and local governments are based on 1987 Census of Government data on employer contributions to social security; these data are extrapolated by state and local government wages that have been adjusted for state coverage differences from annual data from the Social Security Administration. For private industries and the Federal Government, the state estimates are based on wages.

The employer contributions for unemployment insurance are based on state tabulations of employer contributions for the unemployment insurance

Alternative Measures of Household Income

Three of the most widely used measures of household income are BEA's measure of personal income, the Census Bureau's measure of money income, and the Internal Revenue Service's measure of adjusted gross income of individuals.[1]

Personal income, in general, is a more comprehensive measure. For both the national and regional accounts, personal income is defined as the sum of wage and salary disbursements, supplements to wages and salaries, proprietors' income with inventory and capital consumption adjustments, rental income of persons with capital consumption adjustment, personal dividend income, personal interest income, and personal current transfer receipts, less contributions for government social insurance. These measures of personal income include incomes of individuals, nonprofit institutions that primarily serve individuals, private noninsured welfare funds, and private trust funds. Life insurance carriers and noninsured pension plans are not counted as persons, but their income (and saving) is credited to persons.

Money income consists of income in cash and its equivalents that is received by individuals. It excludes, but personal income includes, employer contributions for employee pension and insurance funds, lump-sum payments except those received as part of earnings, certain in-kind personal current transfer receipts—such as Medicaid, Medicare, and food stamps—and imputed income.[2] Money income includes, but personal income excludes, personal contributions for government social insurance, income from government employee retirement plans and from private pensions and annuities, and income from regular interpersonal transfers, such as child support.

In addition, personal income at the national, state, and local area levels is presented annually on a per capita basis (on a simple average per person). Money income at the national and state levels is presented annually both on a per capita basis and on a median household basis.[3] Personal income is not adjusted for inflation, whereas the estimates of money income are available in current dollars, and they are adjusted to remove inflation, using the consumer price index.[4]

Adjusted gross income (AGI) consists of the taxable income of individuals who filed a Federal income tax return. It includes, but personal income excludes, personal contributions for social insurance, gains and losses on the sale of assets, and income from government employee retirement plans and from private pensions and annuities. AGI excludes, but personal income includes, the income of the recipients of taxable incomes who, legally or illegally, did not file an individual income tax return. In particular, AGI excludes the income of many individuals with low incomes who are exempt from filing tax returns. Additionally, AGI excludes certain types of income that are not taxed—such as tax-exempt interest and nontaxable transfer payments, including Medicare, Medicaid, and welfare benefit payments—and it includes the taxable portion of social security benefit payments.

Comparison of Per Capita Income Measures

[Dollars]

	Per capita income		
	2001	2002	2003
State personal income [1]	30,527	30,906	31,632
Money income [2]	22,851	22,794	n.a.
Adjusted gross income [3]	21,684	20,972	n.a.

n/a Not available

1. Bureau of Economic Analysis, available at <www.bea.gov>.

2. Census Bureau's Current Population Survey (CPS), available at <www.census.gov>. The Census Bureau calculates CPS per capita money income using the civilian noninstitutional population total as of March of the next year.

3. Internal Revenue Service (IRS), available at <www.irs.gov>.The IRS does not produce per capita adjusted gross income (AGI). The measures shown are derived by dividing aggregate IRS AGI by total population from the Census Bureau.

1. For additional information, see the Census Bureau's annual publication *Money Income in the United States*; the Internal Revenue Service's annual publication *Statistics of Income—Individual Income Tax Returns*; and Mark A. Ledbetter, "A Comparison of BEA Estimates of Personal Income and IRS Estimates of Adjusted Gross Income: New Estimates for 2001 and Revised Estimates for 1959–2000," SURVEY 84 (April 2004): 8–22.

2. Imputations are added to personal income in both the national and regional measures so that a comprehensive account of total production and its distribution can be presented. For a description of these imputations, see *State Personal Income, 1929–97* (Washington, DC: U.S. Government Printing Office, May 1999): M–44—M–45 or go to <www.bea.gov/bea/mp.htm#regional>.

3. For states, the most recent estimates of money income on a per capita basis and on a median household basis are those for 2002.

4. At the national level, BEA also presents real per capita disposable personal income (DPI). DPI is personal income less personal current taxes; real DPI is DPI divided by the implicit price deflator for personal consumption expenditures. For the sources of the prices used for this deflator, see "Updated Summary of NIPA Methodologies," SURVEY 82 (October 2002): 34–35.

program from the Bureau of Labor Statistics (BLS), on wage and salary data from the Railroad Retirement Board, and for Federal employees, on wages and salaries.

The employer contributions for railroad retirement are based on wages and salaries from the Railroad Retirement Board.

The employer contributions for Federal workers' compensation are based on Federal Government wages and salaries.

The employer contributions for state-administered workers' compensation are based on data from the Census Bureau's annual state government finance surveys.

The employer contributions for the Pension Benefit Guaranty Corporation and for state temporary disability insurance programs are based on state estimates of wages and salaries.

Miscellaneous compensation of employees. The portion of other labor income that consisted of judicial fees paid to jurors and to witnesses, compensation of prison inmates, and marriage fees paid to justices of the peace has been reclassified as wages and salaries. As a result of this reclassification, which will be carried back to the estimates for 1948, wage and salary disbursements increased, and employer contributions for employee pension and insurance funds decreased. Personal income, earnings, and compensation were not affected. This reclassification aligns the definition of the personal income component "supplements to wages and salaries" with the definition of the *SNA 1993* "employers' social contributions."

Personal nontax payments. These payments have been removed from the component personal tax and nontax payments, and personal tax and nontax payments has been renamed "personal current taxes."[7] Specifically, Federal, state, and local government nontaxes—which include donations, fees, and fines—have been reclassified in the NIPAs as personal transfer payments to government in personal outlays. The effect of this change is to decrease personal current taxes and to increase disposable personal income by the amount of the nontax payments.

Other definitional and classificational changes

The remaining definitional and classification changes that affect personal income are the new treatment of banking services, the new treatment of insurance services, farm inventories, mass transit benefits, Indian tribal governments, and farm housing services.

New treatment of banking services. The value of the implicit services of banks and other depository institutions includes the value of collecting funds from depositors or lenders and repackaging them in ways that meet the needs of borrowers, so transactions costs for both depositors and borrowers are reduced. The value of these services is now allocated to depositors and to borrowers in order to recognize that both depositors and borrowers receive these implicit services from banks and other depository institutions; previously, these implicit services were imputed only to depositors. As a result of this new treatment, personal interest income was revised down $80.7 billion in 2002, because households tend to hold a larger share of deposits, and businesses—including owner-occupied housing (which is treated like a business)—tend to hold a larger share of loans.

New treatment of insurance services. The definition of property and casualty insurance services has been changed to recognize the implicit services that are funded by investment income; to provide a more appropriate treatment of insured losses that reduces the large swings in measured services that result from catastrophes, such as the terrorist attacks of September 11, 2001; and to change the treatment of reinsurance. Because of this change in the treatment of these services, personal interest income has increased by the value of the imputed interest attributable to persons as policyholders, and business transfer payments to persons has changed to reflect the net insurance settlements received by persons.[8]

Farm inventories. In the production account of the farm sector, inventories of farm materials and supplies have been added to the change in private farm inventories, and they have been subtracted from "intermediate goods and services purchased." This change improves the measure of gross farm product, maintains consistency with the 1997 input-output accounts, and moves the NIPAs closer to the *SNA 1993* guidelines. The change, which is carried back to the estimates for 1991, affects farm proprietors' income by small amounts.

Mass transit benefits. Mass transit benefits to Federal Government employees is now incorporated into the estimates of Federal Government wages and salaries in order to improve the estimates of total compensation received by Federal employees. On October 1, 2000, all Federal Government employees in the Washington, DC, area became eligible for mass transit benefits of up to $65 per month; in January 2002, the

7. Personal current taxes are subtracted from personal income to derive disposable personal income.

8. Net insurance settlements is calculated as actual insured losses (or claims payable) from the insurance company to the policyholder minus the normal losses that are estimated as a moving average of actual claims adjusted for catastrophic events. In the event of a large disaster, such as Hurricane Andrew or September 11, 2001, current transfer receipts for the affected states increase. When actual losses are less than normal losses, current transfer receipts decrease.

maximum monthly benefit rose to $100 per month. These benefits received by Federal employees now amount to about $140.0 million annually.

Indian tribal governments. Indian tribal governments and enterprises have been reclassified from the private sector to the local government sector. This reclassification affects the state estimates for 1969–2000.[9]

Beginning in 2001, the primary source data used to estimate wages and salaries—BLS tabulations of wages and salaries of workers covered by the state unemployment insurance program—reclassified the wages of employees of Indian tribal governments and of Indian-owned enterprises from the private sector to the local government sector. This reclassification of the data followed a court decision mandating that Indian tribes be treated similarly to governments in accordance with the Federal Unemployment Tax Act.

For 1969–2000, compensation of Indian tribal government employees was subtracted from a number of private sector industries, including amusements, restaurants, hotel, and membership organizations, and it was added to local government compensation. The reclassification does not affect personal income, but it lowers compensation and earnings in the private sector

9. In the national estimates of compensation, the reclassification was carried back to 1990. However, in selected states, the Indian tribal organizations have a significant local presence; for these states, the adjustments were carried back to 1969.

Data Availability

This article presents summary annual estimates of personal income and disposable personal income for 1998–2003; annual estimates of personal income by major source and earnings by industry for 2001–2003; quarterly estimates of personal income for 2000 to 2003; and quarterly estimates of personal income by major source and earnings by major industry for the second quarter of 2002 to the fourth quarter of 2003. These estimates and more detailed estimates of personal income and employment for states are available interactively on BEA's Web site.

The following annual estimates are available at <www.bea.gov/bea/regional/spi>:

- Personal income, per capita personal income, and population for 1969–2003
- Disposable personal income and per capita disposable personal income for 1969–2003
- Personal income by major source and earnings by North American Industry Classification System (NAICS) subsectors for 2001–2002 and by Standard Industrial Classification System (SIC) two-digit industries for 1969–2000
- Personal income by major source and earnings by major SIC division-level industries for 2001
- Wage and salary disbursements by NAICS subsectors for 2001–2002 and by SIC two-digit industries for 1969–2000
- Wage and salary disbursements by major SIC division-level industries for 2001
- Full-time and part-time employment by NAICS subsectors for 2001–2002, by SIC two-digit industries for 1969–2000, and by SIC division-level industries for 2001
- Full-time and part-time wage and salary employment by NAICS subsectors for 2001–2002, by SIC two-digit industries for 1969–2000, and by SIC division-level industries for 2001
- State economic profiles (a selection of personal income and employment data for each state) for 1969–2002
- Personal current transfer receipts by major program for 1969–2002
- Farm income and expenses (including the major categories of gross receipts and expenses for all farms and for measures of farm income) for 1969–2002
- Personal current tax receipts by level of government and by type for 1969–2002
- The following quarterly estimates are available at <www.bea.gov/bea/regional/sqpi>:
- Personal income for 1969–2003
- Personal income by major source and earnings by NAICS sectors for 2001–2003
- Personal income by major source and earnings by SIC division-level industries for 1969–2001
- Wage and salary disbursements by NAICS sectors for 2001–2003
- Wage and salary disbursements by SIC division-level industries for 1969–2001

In addition, the entire set of estimates for all states will soon be available on a CD–ROM that will include an updated description of the sources and methods used to estimate state personal income. To order this free *State Personal Income, 1969–2002* CD–ROM (product number RCN–0350), call the Order Desk at 1–800–704–0415 (outside the United States, call 202–606–9666).

The state personal income estimates are also available through the members of the BEA User Group, which consists of state agencies and universities that help BEA disseminate the estimates in their states. For a list of the BEA User Group, go to <www.bea.gov/bea/regional/docs/usergrp.cfm>.

For more information about these estimates, call BEA's Regional Economic Information System at 202–606–5360, fax 202–606–5322, or e-mail reis.remd@bea.gov.

and raises them in the local government sector.

Farm housing services. The production of services of farm housing owned by farm operators has been reclassified from the farm industry to the real estate industry. This change shifts the income and expenses of owner-occupied farm housing from farm proprietors' income to rental income of persons. The treatment of these services is now the same as that for farm housing owned by nonoperator landlords and for all nonfarm housing.

Statistical changes

The statistical changes listed below are those in which the state source data or methodology have changed. Updates of annual state source data are not described.

Proprietors' income. The state estimates of farm proprietors' income incorporated data on farm income and production expenses from the U.S. Department of Agriculture's 1999 Agricultural Economics Land Ownership Survey. The incorporation of the results of this survey affected the estimates of farm proprietors' income, in particular, the production expenses for 1987–2003.

Dividends, interest, and rent. The estimates of imputed rent for owner-occupied housing incorporated newly available 2000 decennial census data on the market value of owner-occupied housing by state. Previously, the estimates of imputed rent were based on extrapolations of data from the 1990 decennial census.

Personal current transfer receipts. The estimates of Medicare payments are now based on state source data for Medicare payments by residence of the individual who receives the medical care from the Centers for Medicare and Medicaid Services. These data replace the state source data that was by place of the provider of the Medicare services. In addition, the estimates of state and local government general assistance payments to individuals are now based on Census Bureau data from the state and local government finance surveys, the same source that is used to prepare the national estimate. Payments to individuals by the Pension Benefit Guaranty Corporation are now based on data reported in the Consolidated Federal Funds Report from the Census Bureau; previously, the estimates were allocated to states by social security benefits received by individuals.

Adjustment for residence. In the derivation of state personal income, the estimates of the net inflows of the labor earnings of interstate commuters are added to the state estimates of the net labor earnings by place of work in order to yield net labor earnings by place of residence.[10] The state estimates for 1991 forward are revised to incorporate the summary journey-to-work data on employees by place of residence, by place of work, by industry of employment, and by average wages from the 2000 decennial census.

Revisions

The comprehensive revision of state personal income generally resulted in small revisions to the estimates, and for 1969–2002, the direction of the revisions to the levels of personal income for the Nation and for the states was mixed (table G). For the Nation, the largest revision to personal income was a downward revision of 0.9 percent in 1979 and in 1993. For the states, the largest revision was an upward revision of 3.7 percent in 2002 for New Mexico. Personal income for the District of Columbia was revised up 11.5 percent in 2001 and 7.6 percent in 2002; for 1969–2000, the revisions ranged between –2.2 percent and 2.3 percent.

Revisions to long-term growth rates. The average annual percent change in personal income for the Nation was unchanged for 1969–2002. For states, the revisions to the growth rates ranged from an upward revision of 0.2 percentage point to a downward revision of 0.1 percentage point (table H).

Over the current recovery, the revisions to the average annual percent changes for the states ranged from an upward revision of 0.7 percentage point in North Dakota to a downward revision of 1.6 percentage points in Iowa and Idaho.[11] The growth rate for the District of Columbia was revised down 2.7 percentage points. For 34 states, the revisions to the average annual growth rates were between an upward revision of 0.1 percentage point and a downward revision of 0.9 percentage point.

The Plains region remains the fastest growing region over the current recovery; its growth rate was 3.7 percent. The New England region remains the slowest growing region over the current recovery; its growth rate was 2.4 percent.

Effect of the reclassification of employer contributions for government social insurance. Personal income was unchanged by the reclassification of employer contributions for government social insurance, but certain components in the derivation of personal income were revised substantially (table I). For the Nation, total earnings by place of work was revised up $474.0 billion, or 7.5 percent, in 2002; the reclassification of employer contributions for government social insurance accounted for $363.4 billion, or more than 75 percent of the total revision. In addition, total contributions for government social insurance for the Nation was revised up $365.4 billion, or 95.3 percent,

10. Net labor earnings are calculated as wage and salary disbursements plus supplements to wages and salaries minus contributions for government social insurance.

11. For this analysis, the current recovery covers the period from the fourth quarter of 2001 to the third quarter of 2003.

in 2002.[12] Nearly all of the revision to this component is due to the reclassification of employer contributions for government social insurance.

Revisions to the estimates for 2002. Personal income for the Nation for 2002 was revised up $8.9 billion, or 0.1 percent, to $9,199.0 billion. An upward revision of $17.7 billion, or 2.0 percent, to the Southwest region was largely offset by downward revisions of $10.9 billion, or 0.8 percent, to the Great Lakes region and of $5.1 billion, or 0.8 percent, to the Plains region.

Four states and the District of Columbia had the largest upward revisions, of 2.1 percent or more, to personal income (table J). Personal income for the District of Columbia was revised up 7.6 percent; personal income was revised up 3.7 percent for New Mexico, 3.1 percent for Oklahoma, 2.8 percent for Alaska, and 2.1 percent for Utah. These upward revisions were attributable to upward revisions to nonfarm proprietors' income, which incorporated newly available annual tabulations of self-employment and partnership income for 2000. For the District of Columbia, the

12. These revisions are calculated in comparison with the previously published "personal contributions for social insurance."

NOTE. Estimates may not add to totals because of rounding.

upward revision to personal income was also attributable to upward revisions to wage and salary disbursements, which incorporated the mass transit benefits to Federal workers and national updates to Federal civilian source data, and to the residence adjustment, which incorporated journey-to-work data from the 2000 decennial census. For New Mexico, the upward revision was also attributable to an upward revision to dividends, interest, and rent, which incorporated data on owner-occupied housing from the decennial census. For Alaska, the upward revision was attributable to the upward revision to the residence adjustment.

Five states had the largest downward revisions, of 1.2 percent or more. Personal income for Pennslyvania was revised down 1.8 percent; personal income was revised down 1.6 percent for Minnesota, 1.4 percent for Michigan, 1.3 percent for Nebraska, and 1.2 percent for Missouri. These downward revisions were attributable to downward revisions to dividends, interest, and rent, which incorporated data on owner-occupied housing from the decennial census.

Revisions to the ranking by per capita personal income for 2002. By region, the revisions to personal income changed the ranking of the Southeast and Southwest regions. The Southeast region, at $27,837, now has the lowest per capita personal income, and the Southwest region, at $28,017 has the next lowest per capita personal income. The New England region, at $37,413, has the highest per capita personal income (table K).

By state, Missouri and Texas had the largest shifts in ranking. Missouri shifted from 26th to 30th, and Texas shifted from 30th to 26th. Six other states shifted three places in ranking.

The rankings of the top six states were unchanged; Connecticut, at $42,468, still has the highest per capita personal income of any state. All the states in the top quintile remained in the top quintile.

In the bottom quintile, Kentucky, which was ranked 39th, is now ranked 42nd, and South Carolina, which was ranked 40th, is now ranked 41. These states replace Oklahoma, which was ranked 42nd and is now ranked 39th, and Alabama, which was ranked 43rd and is now ranked 40th. Mississippi, at $22,550, still has the lowest per capita personal income.

Pennsylvania	–1.8	–0.1	4.9	–0.7	0.0	–1.5	–0.3	–4.2	0.1

1. Wage and salary disbursements, supplements to wages and salaries, and contributions for government social insurance are estimated by place of work. For the derivation of personal income, the net sum of these components (wages plus supplements less contributions) is converted to a place-of-residence basis by adding the adjustment for residence, which is not calculated for each component.
NOTE. Estimates may not add to total because of rounding.

[p] Preliminary.
[r] Revised.
1. Percent change was calculated from unrounded data.

NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

Table 2. Personal Income by State and Region, 1969–2003

[Millions of dollars]

Area name	Personal income

p Preliminary.
r Revised.
1. Percent change was calculated from unrounded data.

NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

Table 3. Per Capita Personal Income by State and Region, 1969–2003

[Dollars]

Area name	Per capita personal income [1]

p Preliminary.
r Revised.
1. Per capita personal income was computed using midyear population estimates of the Bureau of the Census.
NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

Table 4. Disposable Personal Income by State and Region, 1969–2003

[Millions of dollars]

Area name	Disposable personal income

[p] Preliminary.
[r] Revised.
1. Percent change was calculated from unrounded data.

NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

Table 5. Per Capita Disposable Personal Income by State and Region, 1969–2003

p Preliminary.
r Revised.
1. Per capita disposable personal income was computed using midyear population estimates of the Bureau of the Census.

NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

Table 6. Personal Income by Major Source

[Millions

p Preliminary.
r Revised.
D Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the total.
L Less than $50,000, but the estimates for this item are included in the total.
NA Not available.

1. The industry classification uses the 2002 North American Industry Classification System (NAICS).
2. Midyear population estimates of the Bureau of the Census.
3. Per capita personal income is total personal income divided by total midyear population.
4. Contributions for government social insurance are included in earnings by type and industry, but they are excluded from personal income.

and Earnings by Industry, 2001–2003 [1]—Continued

5. The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.

6. Rental income of persons includes the capital consumption adjustment.

7. Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

8. "Other" consists of the wage and salary disbursements of U.S. residents employed by international organizations and foreign embassies and consulates in the United States.

NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

Table 7. Personal Income by Major Source and

[Millions of dollars, seasonally

[p] Preliminary.
[r] Revised.
D Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the total.
1. The estimates of earnings for 2002-2003 are based on the 2002 North American Industry Classification System (NAICS).
2. Contributions for government social insurance are included in earnings by type and industry, but they are excluded from personal income.
3. The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers: Wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.
4. Rental income of persons includes the capital consumption adjustment.
5. Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
6. "Other" consists of the wage and salary disbursements of U.S. residents employed by international organizations and foreign embassies and consulates in the United States.
NOTE. The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts (NIPAs) because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data. In particular, it differs from the NIPA estimate because, by definition, it omits the earnings of Federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms.

BEA Current and Historical Data

National, International, and Regional Data

This section presents an extensive selection of economic statistics prepared by the Bureau of Economic Analysis (BEA) and a brief selection of collateral statistics prepared by other Government agencies and private organizations. Series that originate in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

BEA's economic statistics are available on BEA's Web site at <www.bea.gov>. The site contains data, articles, news releases, and other information from BEA's national, industry, international, and regional programs.

The tables present annual [A], quarterly [Q], and monthly [M] data

National Data

A. Selected NIPA tables [A, Q]
1. Domestic product and income D–2
2. Personal income and outlays D–18
3. Government current receipts and expenditures ... D–21
4. Foreign transactions D–33
5. Saving and investment D–37
6. Income and employment by industry D–43
7. Supplemental tables D–44

B. Other NIPA and NIPA-related tables
B.1 Personal income and its disposition [A, M] D–47

C. Historical measures
C.1 GDP and other major NIPA aggregates D–48

D. Domestic perspectives [A, Q, M] D–52

E. Charts
Selected NIPA series D–54
Other indicators of the domestic economy D–60

International Data

F. Transactions tables
F.1 U.S. international transactions in goods and services [A, M] D–62
F.2 U.S. international transactions [A, Q] D–63
F.3 U.S. international transactions by area [Q] D–64
F.4 Private services transactions [A] D–67

G. Investment tables [A]
G.1 U.S. international investment position D–68
G.2 USDIA: Selected items D–69
G.3 Selected financial and operating data of foreign affiliates of U.S. companies D–70
G.4 FDIUS: Selected items D–71
G.5 Selected financial and operating data of U.S. affiliates of foreign companies D–72

H. International perspectives [A, Q, M] D–73

I. Charts
The United States in the international economy D–74

Regional Data

J. State and regional tables*

K. Local area table*

L. Charts*

Appendixes

A: Additional information about the NIPA estimates
Statistical conventions D–75
Reconciliation tables [A, Q] D–76
B: Suggested reading D–77

*As a result of the comprehensive revision of state personal income, sections J, K, and L are not included in this issue, but summary estimates are included in the article "Comprehensive Revision of State Personal Income for 1969–2003" in this issue.

As a part of the comprehensive NIPA revision, the estimates from tables B.1 and B.2 are now presented in a new table B.1. The new tables B.2–B.11 will be published in an upcoming issue.

National Data

A. Selected NIPA Tables

The tables in this section include the most recent estimates of gross domestic product and its components; these estimates were released on April 29, 2004, and include the "advance" estimates for the first quarter of 2004.

The selected set of NIPA tables shown in this section presents quarterly estimates, which are updated monthly. In most of these tables, annual estimates are also shown.

The news release on gross domestic product is available within minutes of the time of release, and the "Selected NIPA Tables" are available later that day on BEA's Web site <www.bea.gov>.

The "Selected NIPA Tables" are also available on printouts or diskettes from BEA. To order, call the BEA Order Desk at 1–800–704–0415 (outside the United States, 202–606–9666).

Residual	25	2.4	–0.4	5.8	4.6	–6.0	–6.2	–5.0

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Estimates for durable goods and nondurable goods for 1996 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
2. Includes government consumption expenditures, which are for services (such as education and national defense) produced by government. In current dollars, these services are valued at their cost of production.
3. For some components of final sales of computers, includes computer parts.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following change in private inventories is the difference between gross domestic product and the sum of final sales of domestic product and of change in private inventories; the residual line following structures is the difference between gross domestic product and the sum of the detailed lines of goods, of services, and of structures.

Table 1.3.1. Percent Change From Preceding Period in Real Gross Value Added by Sector

[Percent]

Addendum:								
Gross housing value added	11	2.4	0.7	3.5	–4.3	3.3	14.8	4.5

1. Equals gross domestic product excluding gross value added of households and institutions and of general government.
2. Equals gross domestic business value added excluding gross farm value added.
3. Equals compensation of employees of nonprofit institutions, the rental value of nonresidential fixed assets owned and used by nonprofit institutions serving households, and rental income of persons for tenant-occupied housing owned by nonprofit institutions.
4. Equals compensation of general government employees plus general government consumption of fixed capital.

Addendum:								
Gross housing value added	12	835.3	841.2	837.3	828.2	835.0	864.2	873.7

1. Equals gross domestic product excluding gross value added of households and institutions and of general government.
2. Equals gross domestic business value added excluding gross farm value added.
3. Equals compensation of employees of nonprofit institutions, the rental value of nonresidential fixed assets owned and used by nonprofit institutions serving households, and rental income of persons for tenant-occupied housing owned by nonprofit institutions.
4. Equals compensation of general government employees plus general government consumption of fixed capital.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained- dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. The quantity index for computers can be used to accurately measure the real growth of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 1.5.2 and real growth rates are shown in table 1.5.1.
2. Excludes software "embedded," or bundled, in computers and other equipment.

NOTE. The residual line is the difference between the first line and the sum of the most detailed lines.

Table 1.6.4. Price Indexes for Gross Domestic Purchases

[Index numbers, 2000=100]

1. Gross domestic income deflated by the implicit price deflator for gross domestic product.
2. Gross national income deflated by the implicit price deflator for gross national product.
3. Net domestic income deflated by the implicit price deflator for net domestic product.

NOTE. Except as noted in footnotes 1, 2 and 3, chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

1. Estimates for financial corporate business and nonfinancial corporate business for 2000 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).

2. Effective December 10, 2003, the price index used to estimate chained- dollar gross value added of nonfinancial corporate business has been revised to reflect the 2000 reference year. Effective with the estimates scheduled for release in July 2004, the current-dollar value added will be deflated by a revised chain-type price index calculated using the gross value added chain-type price index for nonfinancial industries from the comprehensive revision to the GDP-by-industry accounts.

3. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100.

4. Chained-dollar net value added of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital.

Energy goods and services [1]	23	344.4	344.0	351.1	336.1	339.3	349.5	353.0
Personal consumption expenditures excluding food and energy	24	5,838.0	6,027.0	5,913.3	5,983.3	6,085.3	6,126.3	6,172.0

1. Consists of gasoline, fuel oil, and other energy goods and of electricity and gas.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

3. Government Current Receipts and Expenditures

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

1. Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).
2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.
3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

1. National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.

5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. Exports and imports of certain goods, primarily military equipment purchased and sold by the Federal Government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.
2. The quantity index for computers can be used to accurately measure the real growth of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 4.2.2. and real growth rates are shown in table 4.2.1.
3. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. For exports and for imports, the residual line is the difference between the aggregate line and the sum of the most detailed lines.

5. Saving and Investment

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
2. Excludes software "embedded," or bundled, in computers and other equipment.
3. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
4. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
5. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
6. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

Residual	24	–5.0	–17.9	–10.4	–15.4	–20.8	–25.1	–28.6
Addenda:								
Private fixed investment in structures	25	711.5	734.5	715.0	722.3	746.0	754.9	753.6
Private fixed investment in equipment and software	26	854.3	901.8	862.8	879.8	916.3	948.5	974.6
Private fixed investment in new structures [7]	27	650.2	665.7	653.8	655.0	669.9	683.9	683.1
Nonresidential structures	28	248.3	236.9	235.9	238.2	237.1	236.3	232.3
Residential structures	29	402.1	428.9	418.0	417.0	432.9	447.6	450.6

1. Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
2. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 5.3.2 and real growth rates are shown in table 5.3.1.
3. Excludes software "embedded," or bundled, in computers and other equipment.
4. Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
5. Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
6. Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
7. Excludes net purchases of used structures and brokers' commissions on the sale of structures.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

1. This series is derived from the Census Bureau series "current cost inventories."
2. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (such as first-in, first-out and last-in, first-out) underlying inventories derived primarily from Census Bureau statistics (see footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

Chained (2000) dollar series for real change in private inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Table 5.7.5B. Private Inventories and Domestic Final Sales by Industry

Ratios of private inventories to final sales of domestic business:						
Private inventories to final sales	27	2.22	2.18	2.14	2.13	2.15
Nonfarm inventories to final sales	28	2.02	1.98	1.92	1.92	1.93
Nonfarm inventories to final sales of goods and structures	29	3.73	3.67	3.52	3.50	3.53

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in private inventories component of GDP. The former is the difference between two inventory stocks, each valued at its respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas, the change in private inventories is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross value added of households and institutions and of general government, and it includes a small amount of final sales by farm and by government enterprises.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

Ratios of private inventories to final sales of domestic business:						
Private inventories to final sales	28	2.51	2.49	2.42	2.40	2.38
Nonfarm inventories to final sales	29	2.30	2.29	2.22	2.20	2.18
Nonfarm inventories to final sales of goods and structures	30	3.75	3.72	3.57	3.54	3.51

1. Inventories are as of the end of the quarter. The quarter-to-quarter changes calculated from this table are at quarterly rates, whereas the change in private inventories component of GDP is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross value added of households and institutions and of general government, and it includes a small amount of final sales by farm and by government enterprises.

NOTE. Estimates in this table are based on the North American Industry Classification System (NAICS).

Chained (2000) dollar inventory series are calculated to ensure that the chained (2000) dollar change in inventories for 2000 equals the current-dollar change in inventories for 2000 and that the average of the 1999 and 2000 end-of-year chain-weighted and fixed-weighted inventories are equal.

Sales of imported new autos [3]	46	84.7	81.7	81.2	81.3	83.1	81.4	80.7

1. Consists of used light trucks only.
2. Consists of final sales and change in private inventories of new autos assembled in the United States.
3. Consists of personal consumption expenditures, private fixed investment, and gross government investment.

NOTE. Chained (2000) dollar series are calculated as the product of the chain-type quantity index and the 2000 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

B. Other NIPA and NIPA-Related Tables

Monthly Estimates

Table B.1 presents the most recent estimates of personal income and its components and the disposition of personal income.

These estimates were released on April 30, 2004, and they update the results of the 2003 comprehensive NIPA revision that were published in the March 2004 SURVEY.

[p] Preliminary.
[r] Revised.
CCAdj Capital consumption adjustment.
IVA Inventory valuation adjustment.
1. Consists of nonmortgage interest paid by households.
2. Equals disposable personal income deflated by the implicit price deflator for personal consumption expenditures.
3. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the annual estimate is the average of the monthly estimates.

C. Historical Measures

This table is derived from the "GDP and Other Major NIPA Series" tables that were published in the February 2004 issue of the SURVEY OF CURRENT BUSINESS and from the "Selected NIPA Tables" that are published in this issue. (The changes in prices are calculated from indexes expressed to three decimal places.)

Table C.1. GDP and Other Major NIPA Aggregates

p Preliminary.

r Revised.

1. Includes royalties, license fees, and other fees associated with the use of intangible assets, including patents, trade secrets, and other proprietary rights, that are used in connection with the production of goods.

2. Includes royalties, license fees, and other fees associated with the use of copyrights, trademarks, franchises, rights to broadcast live events, software licensing fees, and other intangible property rights.

3. Other unaffiliated services receipts (exports) include mainly expenditures of foreign governments and international organizations in the United States and film and television tape rentals. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film and television tape rentals.

4. Includes charges for auxiliary insurance services.

5. Beginning in 1992, the net result of (line 51 – line 52) – (line 55 – line 56) is recorded in "private remittances and other transfers" (table F2, line 38).

Source: Table 3 in "U.S. International Transactions, 2003" in the April 2004 issue of the SURVEY OF CURRENT BUSINESS.

Footnotes to Tables F.2. and F.3.

Footnotes to Tables F.2 and F.3:

1. Credits, +: Exports of goods and services and income receipts; unilateral current transfers to the United States; capital account transactions receipts; financial inflows—increase in foreign-owned assets (U.S. liabilities) or decrease in U.S.-owned assets (U.S. claims).

Debits,–: Imports of goods and services and income payments; unilateral current transfers to foreigners; capital accounts transactions payments; financial outflows—decrease in foreign-owned assets (U.S. liabilities) or increase in U.S.-owned assets (U.S. claims).

2. Excludes exports of goods under U.S. military agency sales contracts identified in Census export documents, excludes imports of goods under direct defense expenditures identified in Census import documents, and reflects various other adjustments (for valuation, coverage, and timing) of Census statistics to balance of payments basis; see table 2 in "U.S. International Transactions, Third Quarter 2003" in the January 2004 issue of the SURVEY OF CURRENT BUSINESS.

3. Includes some goods: Mainly military equipment in line 5; major equipment, other materials, supplies, and petroleum products purchased abroad by U.S. military agencies in line 22; and fuels purchased by airline and steamship operators in lines 8 and 25.

4. Includes transfers of goods and services under U.S. military grant programs.

5. Beginning in 1982, these lines are presented on a gross basis. The definition of exports is revised to exclude U.S. parents' payments to foreign affiliates and to include U.S. affiliates' receipts from foreign parents. The definition of imports is revised to include U.S. parents' payments to foreign affiliates and to exclude U.S. affiliates' receipts from foreign parents.

6. Beginning in 1982, the "other transfers" component includes taxes paid by U.S. private residents to foreign governments and taxes paid by private nonresidents to the U.S. Government.

7. At the present time, all U.S. Treasury-owned gold is held in the United States.

8. Includes sales of foreign obligations to foreigners.

9. Consists of bills, certificates, marketable bonds and notes, and nonmarketable convertible and nonconvertible bonds and notes.

10. Consists of U.S. Treasury and Export-Import Bank obligations, not included elsewhere, and of debt securities of U.S. Government corporations and agencies.

11. Includes, primarily, U.S. Government liabilities associated with military agency sales contracts and other transactions arranged with or through foreign official agencies; see table 4 in "U.S. International Transactions, Third Quarter 2003" in the January 2004 issue of the SURVEY.

12. Consists of investments in U.S. corporate stocks and in debt securities of private corporations and State and local governments.

13. Conceptually, the sum of line 76 and line 39 is equal to "net lending or net borrowing" in the national income and product accounts (NIPAs). However, the foreign transactions account in the NIPAs (a) includes adjustments to the international transactions accounts for the treatment of gold, (b) includes adjustments for the different geographical treatment of transactions with U.S. territories and Puerto Rico, and (c) includes services furnished without payment by financial pension plans except life insurance carriers and private noninsured pension plans. A reconciliation of the balance on goods and services from the international accounts and the NIPA net exports appears in reconciliation table 2 in appendix A in the April 2004 issue of the SURVEY. A reconciliation of the other foreign transactions in the two sets of accounts appears in table 4.3B of the full set of NIPA tables.

Additional footnotes to Table F.3:

14. The "European Union" includes the "European Union (6)," United Kingdom, Denmark, Ireland, Greece, Spain, and Portugal. Beginning with the first quarter of 1995, the "European Union" also includes Austria, Finland, and Sweden.

15. The "European Union (6)" includes Belgium, France, Germany (includes the former German Democratic Republic (East Germany) beginning in the fourth quarter of 1990), Italy, Luxembourg, Netherlands, European Atomic Energy Community, European Coal and Steel Community, and European Investment Bank.

16. Includes, as part of international and unallocated, the estimated direct investment in foreign affiliates engaged in international shipping, in operating oil and gas drilling equipment internationally, and in petroleum trading. Also includes taxes withheld; current-cost adjustments associated with U.S. and foreign direct investment; before 1996, small transactions in business services that are not reported by country; and net U.S. currency flows, for which geographic source data are not available.

17. Details are not shown separately; see totals in lines 56 and 63.

18. Details not shown separately are included in line 69.

[p] Preliminary.
[r] Revised.

1. Represents gains or losses on foreign-currency-denominated assets due to their revaluation at current exchange rates.

2. Includes changes in coverage, capital gains and losses of direct investment affiliates, and other statistical adjustments to the value of assets.

3. Reflects changes in the value of the official gold stock due to fluctuations in the market price of gold.

4. Reflects changes in gold stock from U.S. Treasury sales of gold medallions and commemorative and bullion coins; also reflects replenishment through open market purchases. These demonetizations/monetizations are not included in international transactions financial flows.

5. Also includes paid-in capital subscriptions to international financial institutions and resources provided to foreigners under foreign assistance programs requiring repayment over several years. Excludes World War I debts that are not being serviced.

6. Includes indebtedness that the borrower may contractually, or at its option, repay with its currency, with a third country's currency, or by delivery of materials or transfer of services.

7. Primarily U.S. Government liabilities associated with military sales contracts and other transactions arranged with or through foreign official agencies.

NOTE. In this table, unlike in the international transactions accounts, income and capital outflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 16 and 17 in "U.S. Direct Investment Abroad: Detail for Historical-Cost Position and Related Capital and Income Flows, 2002" in the September 2003 issue of the SURVEY OF CURRENT BUSINESS.

Table G.3. Selected Financial and Operating Data for Nonbank Foreign Affiliates of U.S. Companies by Country and by Industry of Affiliate, 2001

NOTE. In this table, unlike in the international transactions accounts, income and capital inflows are shown without a current-cost adjustment, and income is shown net of withholding taxes. In addition, unlike in the international investment position, the direct investment position is valued at historical cost.

The data in this table are from tables 16 and 17 in "Foreign Direct Investment in the United States: Detail for Historical-Cost Position and Related Capital and Income Flows, 2002" in the September 2003 issue of the SURVEY OF CURRENT BUSINESS.

Table G.5. Selected Financial and Operating Data of Nonbank U.S. Affiliates of Foreign Companies by Country of Untimate Beneficial Owner and by Industry of Affiliates, 2001

	All nonbank affiliates							Majority-owned nonbank affiliates						
	Millions of dollars				Thousands of employees	Millions of dollars		Millions of dollars				Thousands of employees	Millions of dollars	
	Total assets	Sales	Net income	Gross product		U.S. exports of goods shipped by affiliates	U.S. imports of goods shipped to affiliates	Total assets	Sales	Net income	Gross product		U.S. exports of goods shipped by affiliates	U.S. imports of goods shipped to affiliates

D Suppressed to avoid disclosure of data of individual companies.
* Less than $500,000.
1. The industry classification system used to classify the data for U.S. affiliates is based on the North American Industry Classification System. Prior to 1997, the affiliate data were classified using an industry classification system based on the Standard Industrial Classification system.

NOTES. The data in this table are from BEA's annual survey of the operations of U.S. affiliates of foreign companies; see "U.S. Affiliates of Foreign Companies: Operations in 2001," in the August 2003 issue of the SURVEY OF CURRENT BUSINESS.

Size ranges are given in employment cells that are suppressed. The size ranges are: A—1 to 499; F—500 to 999; G—1,000 to 2,499; H—2,500 to 4,999; I—5,000 to 9,999; J—10,000 to 24,999; K—25,000 to 49,999; L—50,000 to 99,999; M—100,000 or more.

H. International Perspectives

The quarterly data in this table are shown at the end month of the quarter.

1. Figures for the Euro area and for the United Kingdom are in U.S. dollars per euro and per pound sterling, respectively. The rate for the United States is a weighted average of the nominal foreign exchange value of the U.S. dollar against the currencies of a Broad Index group of major U.S. trading partners from a base of January 1997=100. For other countries, figures are in currency units per U.S. dollar.

2. Unemployment and GDP figures are revised regularly.

Sources: Exchange rates are from the Board of Governors of the Federal Reserve System. Indexes of stock market prices are calculated from data taken from finance oriented web sites and are rebased to 2000=100 to facilitate comparisons. Other series are drawn from the web sites of the statistical agencies of the countries shown.

NOTE. In 2003, the countries in this table accounted for 62 percent of the value of U.S. imports of goods and 70 percent of the value of U.S. exports of goods. The Euro area consists of Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, and Spain.

Additional Information About the NIPA Estimates

Statistical Conventions

Current-dollar GDP is a measure of the market value of goods, services, and structures that are produced in the economy in a particular period. The changes in current-dollar GDP can be decomposed into quantity and price components. Quantities, or "real" measures, and prices are expressed as index numbers with the reference year—at present, the year 2000—equal to 100.[1]

The annual changes in quantities and prices are calculated using a Fisher formula that incorporates weights from 2 adjacent years. For example, the annual percent change in real GDP for 2001–2002 uses prices for 2001 and 2002 as weights, and the 2001–2002 annual percent change in the GDP price index uses quantities for 2001 and 2002 as weights. Because the Fisher formula allows for the effects of changes in relative prices and in the composition of output over time, the resulting quantity or price changes are not affected by the substitution bias that is associated with changes in quantities and prices calculated using a fixed-weighted formula. These annual changes are "chained" (multiplied) together to form time series of quantity and price indexes. The percent changes in the Fisher indexes are not affected by the choice of the reference year.

BEA also publishes implicit price deflators (IPDs), which are calculated as the ratio of the current-dollar value of a component to the chained-dollar value of the component, multiplied by 100. The values of an IPD are very close to the values of the corresponding "chain-type" price index.

The measures of real GDP and its major components are also presented in dollar-denominated form, designated "chained (2000) dollar estimates." For most series, these estimates are computed by multiplying the current-dollar value in 2000 by a corresponding quantity index number and then dividing by 100. For example, if a current-dollar GDP component equaled $100 in 2000 and if real output for this component increased by 10 percent in 2001, then the chained (2000) dollar value of this component in 2001 would be $110 ($100 × 1.10). The percent changes calculated from the chained (2000) dollar estimates and from the quantity indexes are the same; any differences will be small and due to rounding.

The chained-dollar values for the detailed GDP components will not necessarily sum to the chained-dollar estimate of GDP (or to any intermediate aggregate) in a table, because the relative prices that are used as weights for any period other than the reference year differ from those of the reference year. A measure of the effect of such differences is provided by a "residual" line—the difference between the chained-dollar value of the main aggregate in the table and the sum of the most detailed components in the table. For periods close to the reference year, when the relative prices that are used as weights have usually not changed much, the residuals tend to be small, and the chained-dollar estimates can be used to approximate the contributions to growth and to aggregate the detailed estimates. For periods further from the reference year, the residuals tend to be larger, and the chained-dollar estimates are less useful for analyses of contributions to growth. In particular, for components for which relative prices are changing rapidly, the calculation of contributions based on chained-dollar estimates may be misleading even just a few years from the reference year. Thus, contributions derived from quantity indexes provide a better measure than contributions derived from chained-dollar estimates; contributions based on quantity indexes are shown in selected NIPA tables 1.1.2, 1.2.2, 1.5.2, 2.3.2, 3.9.2, 4.2.2, and 5.3.2.

For quarters and months, NIPA estimates are presented at annual rates, which show the value that would be registered if the rate of activity that is measured for a quarter or for a month were maintained for a full year. Annual rates are used so that periods of different lengths—for example, quarters and years—may be more easily compared. These annual rates are determined simply by multiplying the estimated rate of activity by 4 (for quarterly data) or by 12 (for monthly data).

For most quarterly NIPA estimates, *percent changes* in the estimates are also expressed at annual rates. Calculating these *changes* requires a variant of the compound interest formula:

$$r = \left[\left(\frac{x_t}{x_o}\right)^{m/n} - 1\right] \times 100$$

where r is the percent change at an annual rate; x_t is the level of activity in the later period; x_o is the level of activity in the earlier period; m is the periodicity of the data (for example, 1 for annual data, 4 for quarterly data, or 12 for monthly data); and n is the number of periods between the earlier periods and the later periods (that is, $t–0$).

Quarterly and monthly NIPA estimates are seasonally adjusted if necessary. Seasonal adjustment removes from the time series the average effects of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

Suggested Reading

The Bureau of Economic Analysis (BEA) has published a wealth of information about the methodologies that are used to prepare its national, industry, international, and regional accounts. In addition, most of this information is available on BEA's Web site at <www.bea.gov>. Look under "Methodologies"; for articles from the SURVEY OF CURRENT BUSINESS, look under "Publications."

National accounts

The national accounts encompass the detailed estimates in the national income and product accounts (including gross domestic product) and the estimates of wealth and related estimates.

National income and product accounts (NIPAs). This series of papers documents the conceptual framework of the NIPAs and the methodologies that have been used to prepare the estimates.

An Introduction to National Economic Accounting (1985) [also in the March 1985 SURVEY]

Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends (2002)

Government Transactions (1988)

Personal Consumption Expenditures (1990)

The methodologies described in these papers have been updated and improved, typically as part of the comprehensive and annual revisions of the NIPAs.

The following SURVEY articles describe the most recent comprehensive revision of the NIPAs.

"Improved Estimates of the National Income and Product Accounts for 1929–2002: Results of the Comprehensive Revision" (February 2004)

"Preview of the Revised NIPA Estimates for 1997 Effects of Incorporating the 1997 Benchmark I-O Accounts and Proposed Definitional and Statistical Changes" (January 2003)

"Preview of the 2003 Comprehensive Revision of the National Income and Product Accounts"

Changes in Definitions and Classifications (June 2003)

New and Redesigned Tables (August 2003)

Statistical Changes (September 2003)

In addition, see the following articles.

"Annual Revision of the National Income and Product Accounts" (August 2002).

"Chained-Dollar Indexes: Issues, Tips on Their Use, and Upcoming Changes" (November 2003) discusses the advantages of using chain-weighted indexes and the challenges of using chained dollars.

"Measuring the Services of Commercial Banks in the NIPAs: Changes in Concepts and Methods" (September 2003)

"Measuring the Services of Property-Casualty Insurance in the NIPAs: Changes in Concepts and Methods" (October 2003)

"Reliability of GDP and Related NIPA Estimates" (January 2002) evaluates the principal NIPA estimates by examining the record of revisions to them.

Fixed assets and consumer durable goods. *Fixed Assets and Consumer Durable Goods in the United States, 1925–97* (2003) discusses the concepts and statistical considerations that underlie the estimates and their derivation.

"Fixed Assets and Consumer Durable Goods for 1925–2002" (May 2004) describes the improvements that were incorporated into these estimates as part of the comprehensive NIPA revision.

Industry accounts

The industry accounts consist of the estimates of gross domestic product by industry, the input-output accounts, and two satellite accounts.

"Preview of the Comprehensive Revision of the Annual Industry Accounts: Integrating the Annual Input-Output Accounts and the Gross-Domestic-Product-by-Industry Accounts" (March 2004) provides the details about the upcoming comprehensive revision.

Gross product by industry. "Improved Estimates of Gross Product by Industry for 1947–98" (June 2000) describes the most recent comprehensive revision of these estimates.

"Gross Domestic Product by Industry for 1999–2001" (November 2002) describes the most recent annual revision of the these estimates.

Mission Statement and Strategic Plan

The mission statement of the Bureau of Economic Analysis and the latest update to its strategic plan for improving the accuracy, reliability, and relevance of the national, industry, regional, and international accounts are available on BEA's Web site at <www.bea.gov>; look under "About BEA."

Input-output accounts. "Benchmark Input-Output Accounts for the U.S. Economy, 1997" (December 2002) presents the 1997 accounts and describes the improvements that were incorporated.

Satellite accounts. These accounts extend the analytical capacity of the input-output accounts by focusing on a particular aspect of economic activity.

"U.S. Transportation Satellite Accounts"
For 1992 (April 1998)
For 1996 (May 2000)

"U.S. Travel and Tourism Satellite Accounts"
For 1992 (July 1998)
For 1996 and 1997 (July 2000)

International accounts

The international accounts encompass the international transactions accounts, direct investment, and international transactions in services.

International transactions accounts (ITAs). *The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures* (1990) describes the methodologies used to prepare the estimates in the ITAs and the international investment position of the United States. These methodologies are usually updated and improved as part of the annual revisions of the ITAs.

The annual revisions of the ITAs are described in a series of articles, the latest of which was published in the July 2003 SURVEY.

Direct investment. *International Direct Investment: Studies by the Bureau of Economic Analysis* (1999) is a collection of previously published articles on U.S. direct investment abroad and foreign direct investment in the United States. It also includes the following information.

The "Methodology for U.S. Direct Investment Abroad," which is also available in *U.S. Direct Investment Abroad: 1994 Benchmark Survey, Final Results* (1998)

"A Guide to BEA Statistics on U.S. Multinational Companies," which is also available in the March 1995 SURVEY

"A Guide to BEA Statistics on Foreign Direct Investment in the United States," which is also available in the February 1990 SURVEY

In addition, the updated methodology for foreign direct investment in the United States is available in *Foreign Direct Investment in the United States: Final Results From the 1997 Benchmark Survey* (2001).

International services. *U.S. International Transactions in Private Services: A Guide to the Surveys Conducted by the Bureau of Economic Analysis* (1998) describes 11 surveys. It includes classifications, definitions, release schedules, the methods used to prepare the estimates, and samples of the survey forms.

"Selected Issues in the Measurement of U.S. International Services" (June 2002) describes key issues in defining and measuring insurance, wholesale and retail trade, finance, construction, and utilities services and explores possible actions to address these issues.

Regional accounts

The regional accounts include estimates of personal income and gross state product.

Personal income. Estimates of personal income are prepared for States and for local areas.

"Comprehensive Revision of State Personal Income for 1969–2003" (May 2004) describes the improvements in the methodology that are used to prepare the estimates and that are part of a comprehensive revision.

"State Personal Income: Revised Estimates for 1999–2001" (October 2002) presents the most recent annual revision of these estimates.

"The Reliability of the State Personal Income Estimates" (December 2003) evaluates the estimates of state personal income and of selected components by examining the revisions of these estimates.

"Comprehensive Revision of Local Area Personal Income for 1969–98" (July 2000) summarizes the changes in the methodology that is used to prepare the estimates for counties and metropolitan areas. The detailed methodology is available on the CD–ROM *Regional Economic Information System, 1969–2001.*

"Local Area Personal Income, 1999–2001" (May 2003) presents the most recent annual revision of these estimates.

Gross state product. "Comprehensive Revision of Gross State Product by Industry, 1977–94" (June 1997) summarizes the sources and the methods that are used to prepare the estimates. "Gross State Product by Industry, 1977–98" (October 2000) describes the most recent comprehensive revision of these estimates.

"Gross State Product by Industry, 1999–2001" (June 2003) presents the most recent annual revision of these estimates.
